TO THE TRADE.

We have pleasure in issuing this Illustrated Catalogue of General Hardware.

We purpose keeping constantly on hand a full assortment of all goods enumerated in this book, thus ensuring prompt execution of all orders.

Our stock is the largest and most complete in the Dominion.

Our travellers will call upon customers regularly. Orders received through them, or by mail, telegraph or telephone, will at all times have our best and most careful attention.

The large increase for years past of Letter-orders received by us, lead us to hope that this Catalogue will be of great assistance to our patrons and friends in making their selections.

Owing to frequent fluctuations in values, we have deemed it undesirable to affix definite prices and discounts, but we shall be pleased to supply same on application.

We have included tables of weights and measures, etc., also standard lists, which we trust will be found useful.

With our complete stock and shipping facilities, our friends may depend upon careful and prompt attention to all orders entrusted to us.

Yours respectfully,

CAVERHILL, LEARMONT & CO.

No. 46—Stag Handle ..... Per doz. $10 30

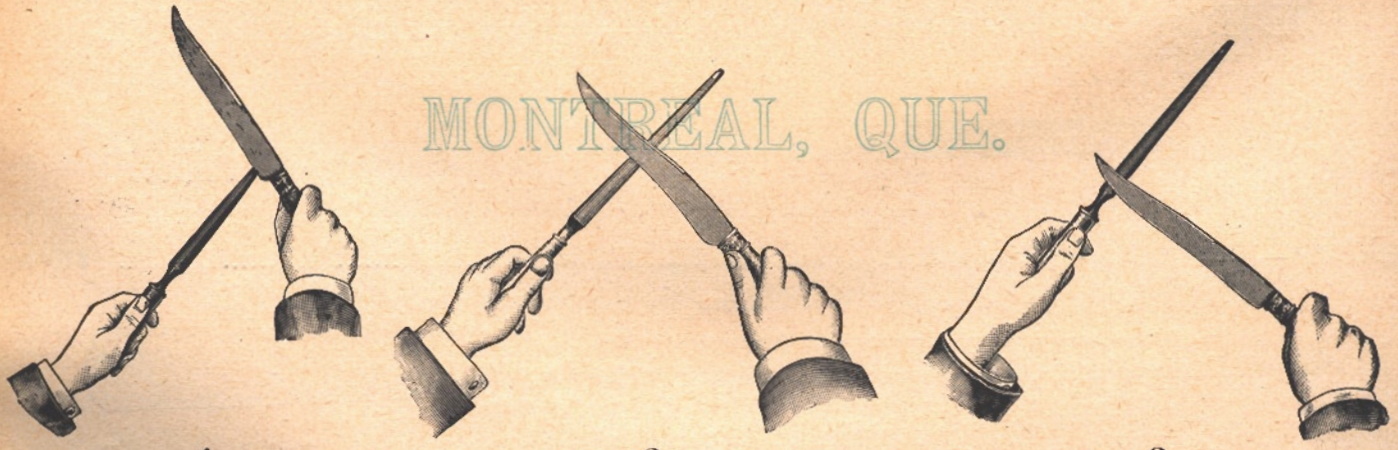

46F

No. 46F—Stag Handle, Sterling Ferrule ..... Per doz. $16 00

Lee's Celebrated Steels are Put Up in all Carving Sets.

There are very few people who know how to properly sharpen a knife on a steel. A carving knife should be sharpened often. A few strokes on a steel are enough, provided the steel is the right kind. Watch a marketman cutting meat and you will notice that he sharpens his knife very often—a few rubs on a steel, but repeated every few minutes.

A carving knife has to do harder work than a butcher knife; its edge is blunted by contact with the bones in the meat, as well as with the bottom of the platter; and yet most people let it go for weeks without sharpening and expect it to cut easily. The reason is, they don't know how to sharpen it on a steel.

1 2 3

This is to show you how to use a steel. Hold the steel in the left hand, rigid, as shown in Cut No. 1. Bring the heel of the blade at an angle of fifteen degrees, against the end of the steel. Draw the blade down the steel towards you (Cut 2) so that the point of the blade shall leave the steel very near the lower end of the steel (Cut 3).

Repeat this, first on one side and then on the other—a dozen strokes are ample.

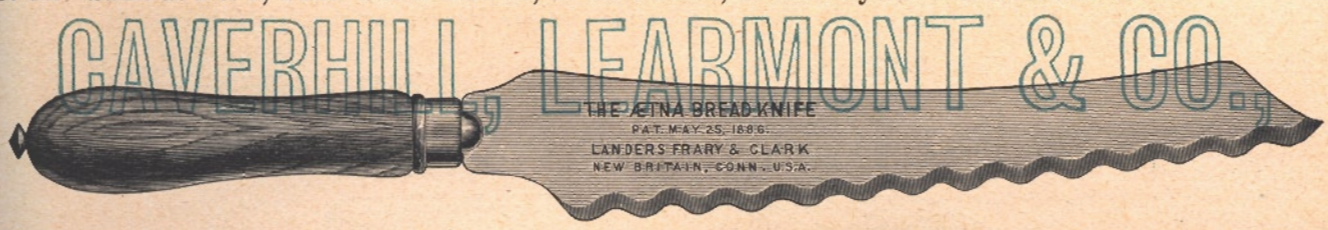

Be careful to hold the blade at an angle of about fifteen degrees to get the best results. This is the way a butcher sharpens his knife.

PATENT "ECLIPSE" DOOR SPRINGS.

The Eclipse Spring is suitable for either Right or Left Hand Doors.

The Spring is adjustable tension, very compact and powerful and is made from extra heavy clock-spring steel of the finest quality.

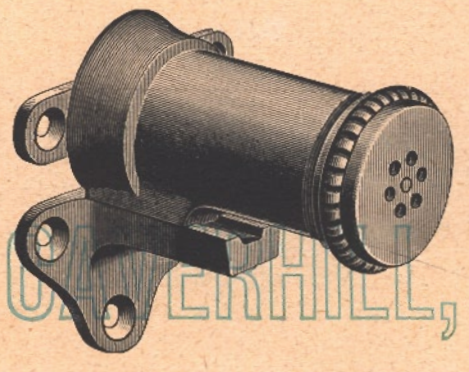

For applying the Eclipse Spring use the Template packed with each Spring and follow the directions carefully.

Tuscan Bronzed.

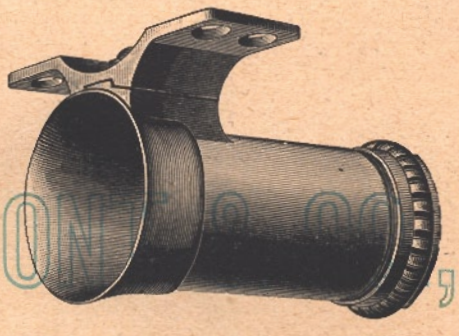

For What Doors Suitable :

No. 1251—Inside Doors	Each	$ 1 80
No. 1253—Wide Inside Doors or Narrow Outside Doors	"	2 30
No. 1255—Wide Outside Doors	"	3 00
No. 1257—Very Wide Outside Doors.	"	4 00

PATENT "ECLIPSE" DOOR CHECKS.

For applying to Door.

For applying to Casing.

CAVERHILL, LEARMONT & CO.,
WHOLESALE
HARDWARE MERCHANTS,
MONTREAL, QUE.

Successfully Prevents Doors from Slamming.

All the Eclipse Door Checks are packed with detachable feet, so that the same check can be applied to either the door or the casing as desired. The detachable foot for attaching to the door is so arranged that the cylinder may be properly adjusted, in or out, to suit doors differently set in their frames. The set-screw holds the cylinder firmly when adjusted.

By screwing the cap at the end of the Cylinder the Check can be instantly varied for light or heavy draft.

Tuscan Bronzed.

For What Doors Suitable :

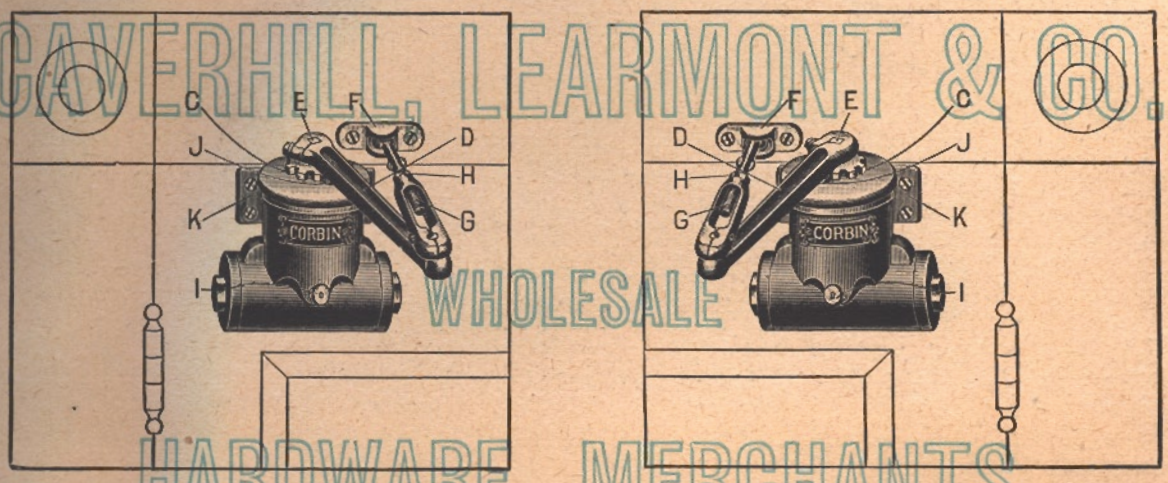

No. 1223—Ordinary Doors, Diam. of Cylinder, 1½ inch	Each	$ 3 00
No. 1225—Wide Doors, " " " 2 "	"	4 00
No. 1227—Very Wide Doors, " " " 2½ "	"	6 00

One in a Box.

When ordering, state whether right-hand or left-hand checks are desired, as they are packed in both ways. Although the changing of the hand by inverting the spring is a simple operation, customers will save time and trouble by observing this request. In the absence of instructions, right-hand checks are always sent.

No. 454—For Heavy Outside Doors	"	13 20
No. 455—For Heavy Outside Doors (Extra Strong Spring)	"	13 20

These Checks are REVERSIBLE (adaptable to either right or left-hand doors) and may be applied to the door on the hinge side only. This method of application is the most desirable, and should be followed whenever practicable.

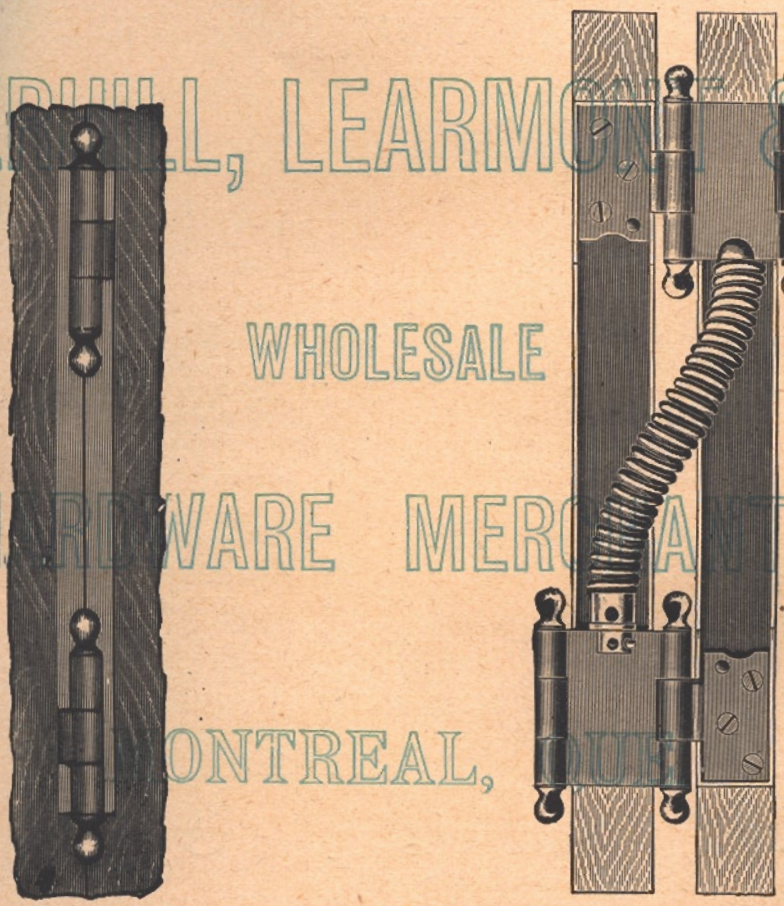

Thus applied the Spring exerts a PUSHING ACTION in closing the door.

As sent out from factory or warehouses they are invariably intended for right-hand doors. They may easily be adapted to left-hand doors by following the instructions packed with each Check.

Full Directions for applying and reversing are packed with each Check.

WHOLESALE
HARDWARE MERCHANTS,
MONTREAL, QUE.

SILL CATCH.

FULL SIZE CUTS.

1647½.

These Hinges lock the blind by the action of gravity, and, being made from heavy gauges of wrought steel, will not break.

Their improved construction enables the blind to be securely locked when open, and the Hinge to be unlocked without lifting the blind.

To unlock the blind when open, it is only necessary to push the lower part laterally away from the window.

The improved sill catch prevents the closed blind from being opened from the outside.

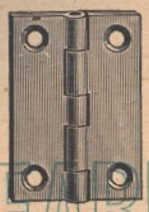

These Hinges are applied in substantially the same mauner as those ordinarily in use, and require the same number and sizes of screws.

Each set is packed in a neat paper box, complete with screws, and each dozen sets in a larger box.

Six Dozen Sets in a Case.

Three Pairs in a Package.

HARDWARE MERCHANTS,

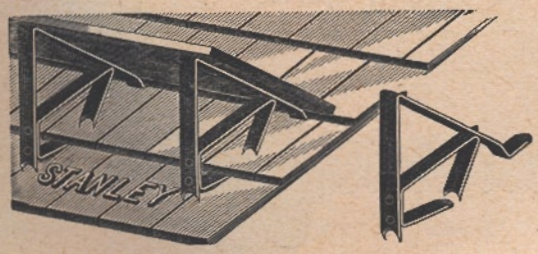

STANLEY'S PATENT ROOFING BRACKET.

MONTREAL, QUE.

The parts are of Spring Steel and firmly riveted together. The bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above increases its stability. Two steel spurs project above the horizontal surface of the Bracket, to secure the staging boards.

To Set the Bracket

Grasp the back Standard with the fingers through the centre part, and spring the bow open enough for the front prong to clear the shingle butt ; then press the two beveled ends up under the shingles already laid, until the front shoulder strikes the butt of the upper course.

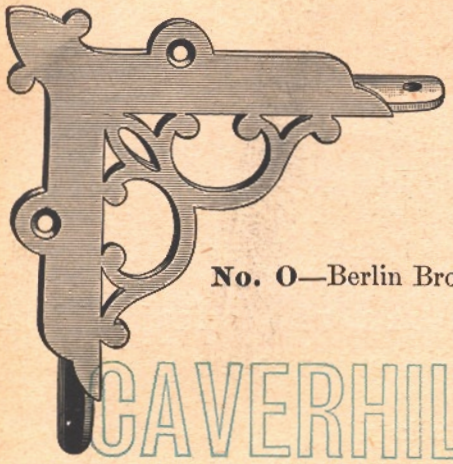

To Remove the Bracket.

Grasp the back Standard with the fingers under the front of the bow ; by a slight pressure with the hand, both sets of prongs can then be raised from contact with the shingles, thus releasing the Bracket and leaving the roof without any nail holes in the shingles.

One dozen per minute can be placed in position, or removed, and great economy in lumber and nails will be found. There are no loose parts to get lost, and no nail holes are made in the roof. In constant use these Brackets will last a lifetime.

No. 1—Roofing Brackets, 8 inch, Half Dozen in a Box.....Per dozen $ 4 60

2 Inch Wheel, 2⅛ Inch Iron Plate.

186	33	Bronzed Iron Common Stem, Iron Wheel			"	0 85
186	37	" "	Oblong Plate	" "	"	0 85

This Caster revolves upon a series of steel rollers or discs, placed in an annular chamber and carries the weight outside the centre of the main wheel. This gives an even bearing upon the circle of discs, and relieves all friction upon the pivot or strain upon the fastening screws. The parts are riveted together firmly, and free access is given to the screws through an opening in the plate.

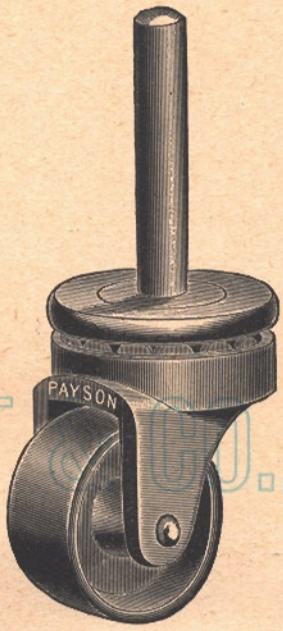

Packed One Set in a Box.

TRAMMEL POINTS.

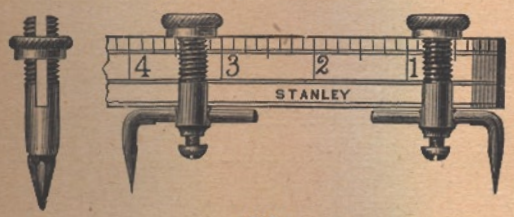

These new Trammel Points are so constructed that they can be attached to one side of any straight stick, without exact regard to its size, and are thus quickly adjusted for use.

The peculiar form of the socket makes it possible to use an ordinary-sized pencil, or a full-sized, oval-shaped carpenters' pencil.

CAVERHILL, LEARMONT & CO.,

No. 4—Brass, with Steel Points ..... Per pair $ 1 00

99

A practical form of Trammel Points, adapted for convenient use on a Carpenters' Rule. They can be attached to Folding Rules of any ordinary width ; and on many kinds of work will take the place of regular Trammel Points, Calipers or Dividers.

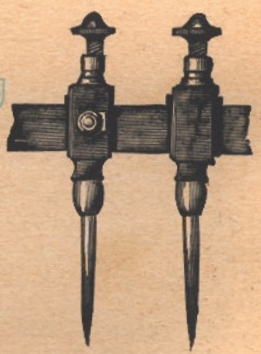

A complete set consists of two Brass Trammel Heads, with movable Steel Points, and one Head with a Pencil Socket.

No. 99—Rule Trammel Points, per Set of Three in a Box. $ 0 90

No. 16—Iron Handle, Steel Blade.....Per doz. $11 20

One-half Dozen in a Box.

ADJUSTABLE TRY SQUARES.

The Blade of this Square can be firmly and accurately secured in its seat, at any point. When the Blade is carried fully to the front of the Handle, it is like an ordinary Try Square in all its uses, and the moving of the Blade admits of making the Try Square equally perfect down to ⅛ inch Blade, or less. This Tool will be found invaluable in putting on Butts or Locks, and doing short work about windows, doors, etc.

Iron Handle, Graduated Steel Blade.

STANLEY RULE AND LEVEL CO.'S

DUPLEX PLUMBS AND LEVELS.

25

These Levels have the ordinary form of leveling glass, set in the top surface of the Stock. For any uses where an observation of the glass, *sidewise*, may be found convenient, an additional leveling glass is set in the side, at the opposite end from the Plumb. Both glasses are protected by Brass Discs, can be seen from either side, and are inserted in the Level with the least possible removal of wood from the Stock.

No. 25—Patent Adjustable Plumb and Level, Mohogany, Arch Top Plate, Improved Duplex Side Views, Polished, Tipped, Assorted, 24 to 30 in ..... Per doz. $35 20

No. 30—Patent Adjustable Plumb and Level, Cherry, Arch Top Plate, Improved Duplex Side Views, Polished, Tipped, Assorted, 24 to 30 in ..... " 27 20

WHOLESALE
HARDWARE MERCHANTS,
MONTREAL, QUE.

STANLEY'S IMPROVED LEVEL SIGHTS.

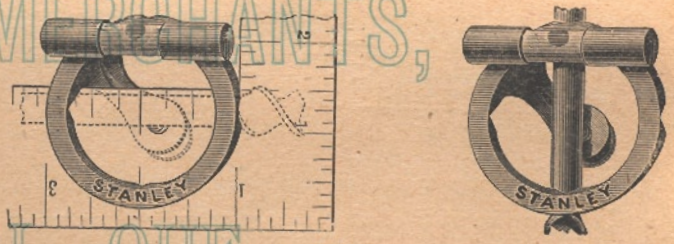

1

By the use of these ingenious devices, which can be attached to any Level, the owner has a convenient and accurate means for leveling, from one given point to another at a long distance away.

When not in use, the Level Sights are easily detached, and can be packed away in a small space for future use.

No. 1—Improved Level Sights, per pair, in a box..... $1 20

STANLEY'S PATENT BIT AND SQUARE LEVELS.

44

The frame of this Level has three pairs of V slots on its back edges. The shank to a Bit will lie in these slots, either parallel with the bubble-glass, at an exact angle to it, or at an angle of 45 degrees.

A Thumb Screw secures the Level to the Bit, in either position ; and boring can be done with perfect accuracy as to perpendicular, horizontal or angle of 45 degrees, by observing the bubble-glass while turning the bit.

The frame can also be attached to a Carpenter's Square. Two shoulders rest on the top of the horizontal leg to the square, thus making it an accurate Spirit-level. The upright leg of the square will indicate an exact Plumb-line.

No. 44—Bit and Square Level, Brass Frame, one in a box..... Per doz. $5 50

PROVED LEVEL GLASSES.

Made of extra thick tubing. By a patented process, each Level Glass is marked at its highest, or crowning point, by two indelible lines, and each Plumb Glass with a single line. The owner can thus easily set the glass accurately in its proper position.

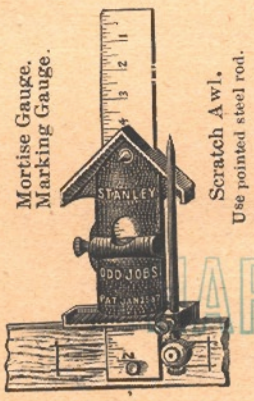

Proved Level Glasses, 1, 1¼, 1½ or 1⅝ in., per doz.						$0 75

HAND TALLY REGISTER.

The above cut shows the position in which the Tallying Register is held in use.

HARDWARE MERCHANTS,

This little Register tallies from 1 to 1000, and can be set to zero at will. It is simple in construction, can be carried in the pocket, is about the size of an ordinary watch and weighs about six ounces. It is used by Railroad Telegraph and Steamboat men for checking or tallying ties, telegraph poles and passengers, and all kinds of freight, by cattle men for counting cattle and sheep, by lumber men, loggers and timber estimators, and by Detectives and Spotters, and at places of amusement for counting the people going in and out. In fact it can be used for any purpose where a correct count is desired to be kept. Price $5.00 each.

CORE BOX PLANE.

A Tool much needed by Pattern-Makers, Wheelwrights, and others, for planing out semi-circles.

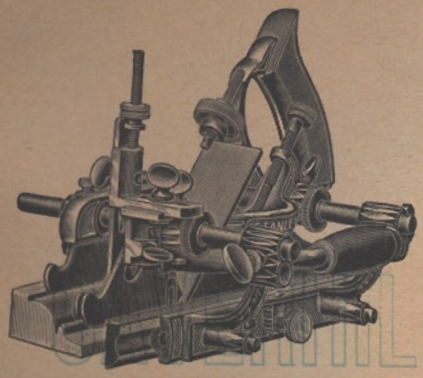

This Plane is constructed so that the sides can be extended by additional sections, 2½ in. wide, until a diameter of 10 inches can be worked, if desired.

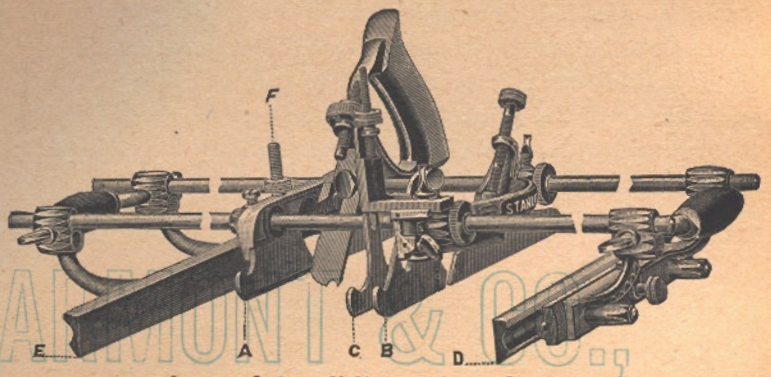

No. 57—Core-Box Plane (with one pair of additional sections), for working semi-circles, up to 5 in. diameter.....Each $4 00

The price for extra additional Sections, for working larger diameters.....Per pair 1 00

STANLEY RULE AND LEVEL CO.'S

STANLEY'S PATENT UNIVERSAL PLANE.

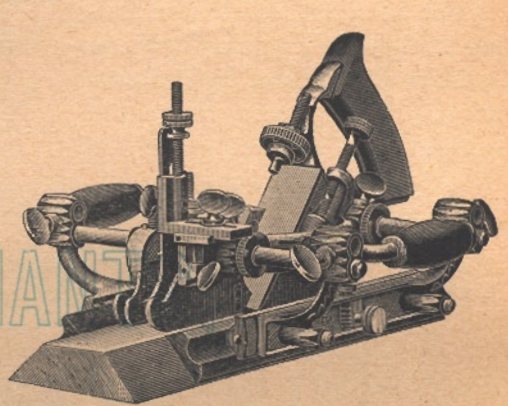

This Tool, in the hands of an ordinary carpenter, can be used for all lines of work covered by a full assortment of so-called Fancy Planes.

No. 55—Stanley's Universal Plane, with 52 Tools, Bits, etc.....$16 00

☞The Plane is Nickel Plated; the 52 Cutters are arranged in four separate cases; and the entire outfit is packed in a neat wooden box.

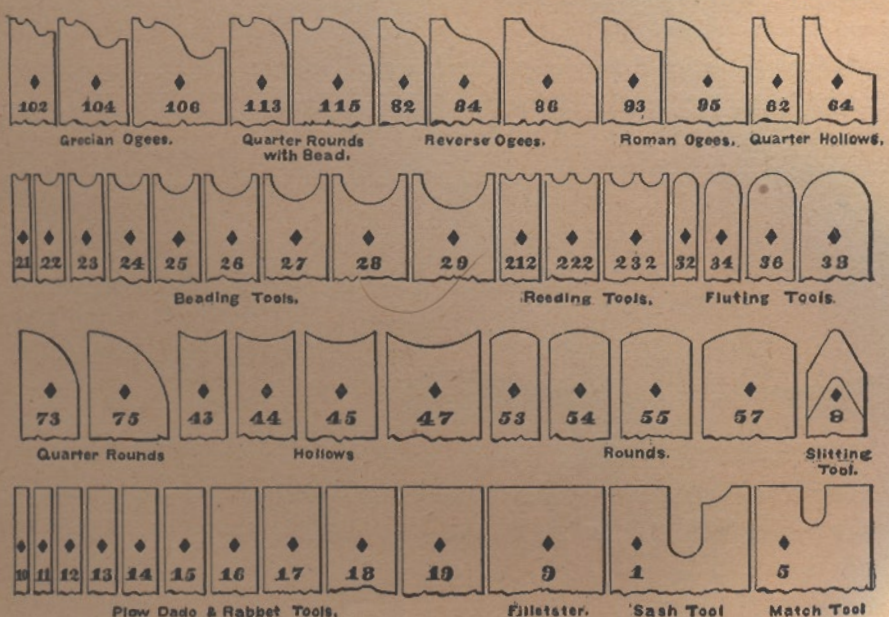

This Plane consists of:—

A Main Stock (A) with two sets of transverse sliding arms, a depth gauge (F) adjusted by a screw, and a Slitting Cutter with stop.

A Sliding Section (B) with a vertically adjustable bottom.

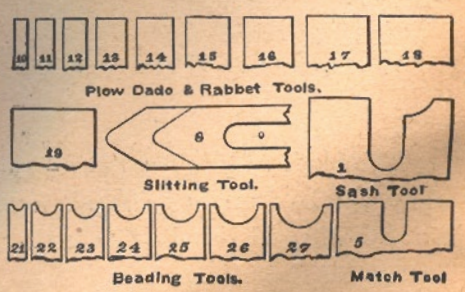

The Auxiliary Centre Bottom (C) is to be placed in front of the Cutter, as an extra support, or stop, when needed. This bottom is adjustable both vertically and laterally.

Fences (D) and (E). Fence D has a lateral adjustment by means of a screw, for extra fine work. The Fences can be used on either side of the Plane, and the rosewood guides can be tilted to any desired angle, up to 45°, by loosening the screws on the face. Fence E can be reversed for Centre Beading wide boards.

An Adjustable Stop to be used in beading the edges of matched boards is inserted on left hand of sliding section (B).

Each Plane is sold with Fifty-two (52) Cutters, marked ▲ on within iist.

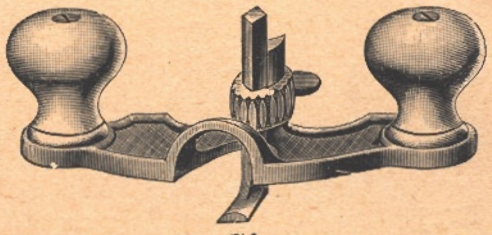

STANLEY RULE AND LEVEL CO.'S

WOODWORKERS' ROUTER PLANE.

This Tool should be added to the kit of every skilled Carpenter, Cabinet Maker, Stair Builder, Pattern Maker or Wheelwright. It is perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any woodwork.

The Bits can also be clamped to the back side of the upright post, and outside of the stock. In this position they will plane into corners. will router out mortises for Sash-frame Pulleys, or will smooth surfaces not easily reached with ony other tool.

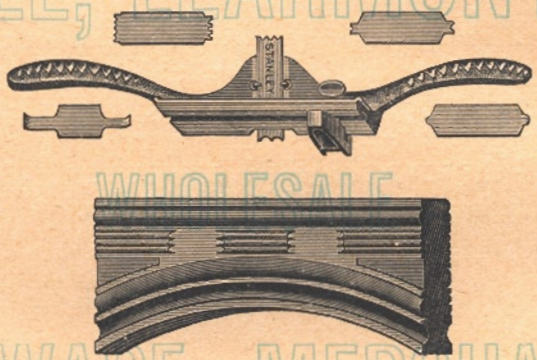

71

No. 71—Nickel-plated Stock, with Steel Bits (¼ and ½ inch) Each $1 50

CAVERHILL, LEARMONT & CO.,

UNIVERSAL HAND BEADER.

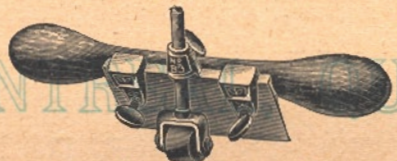

For Beading, Reeding or Fluting straight or irregular surfaces, and for all kinds of light Routering. With square gauge for straight, and an oval gauge for curved work.

Seven superior steel cutters go with each Tool. Both ends are sharpened, thus embracing six ordinary sizes of Beads, four sets of Reeds, two Fluters and a double Router Iron (⅛ and ¼ inch).

Lincoln

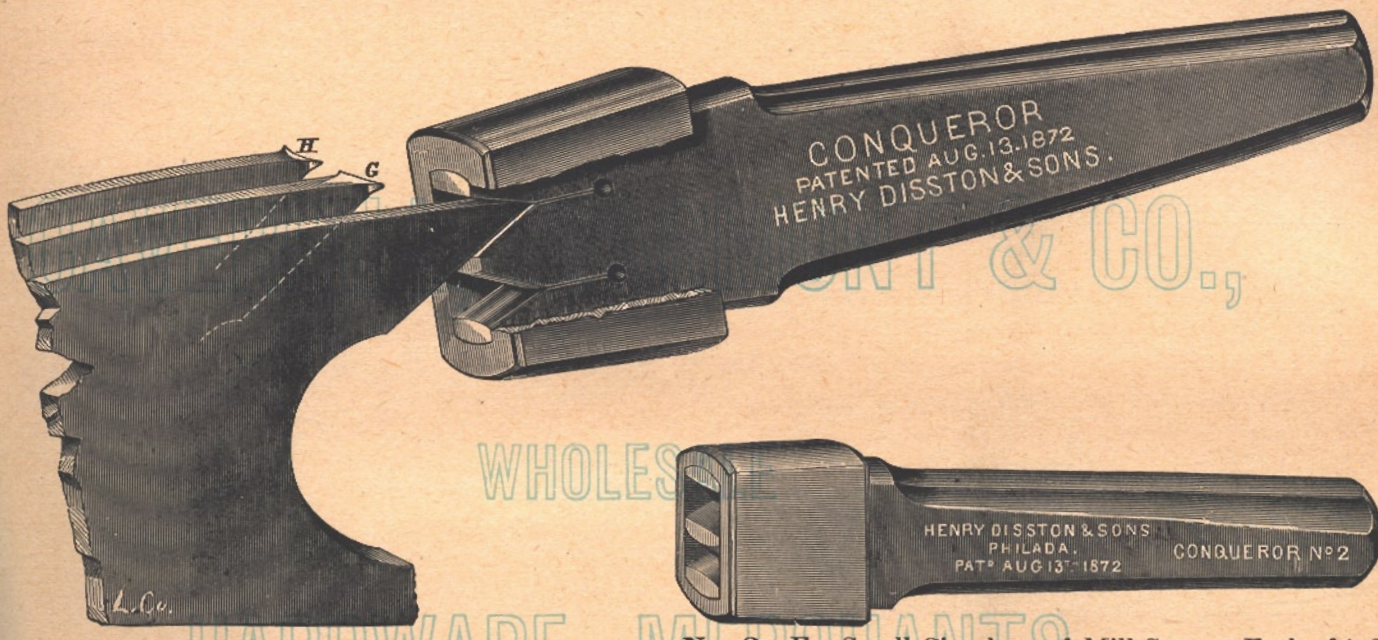

Whiting

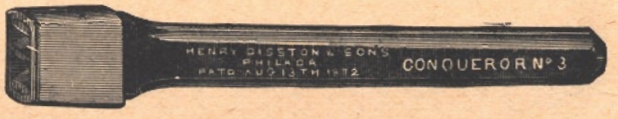

The Lincoln Saw Set, for Cross Cut Saws.....Per doz. $11 50
The Whiting " " " ..... " 11 50

THE CONQUEROR SWAGE, JUMPER OR UPSET.

No. 1—For Large Circular Saws.....Each $5 20

No. 2—For Small Circular and Mill Saws....Each $4 30

No. 3—For Small Circular Saws.....Each $3 50

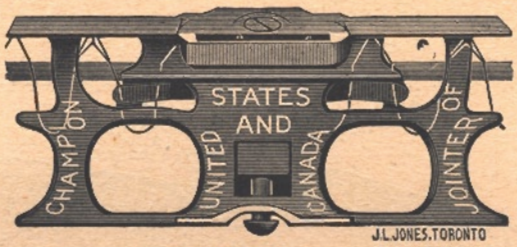

For Band Saws .....Each $4 30

The lower opening in the swage being rounded on the bottom, takes its bearing on the centre of the tooth, spreading and shaping it as shown on section of tooth *H*. The upper opening (in which section of tooth is inserted) is used for squaring up, and leaves the tooth as shown at *G*.

The teeth of a saw require to be swaged to a sharp, keen edge, and the bottom of the openings in the Conqueror being slotted it is impossible to blunt or injure the fine cutting edge of the tooth, which is frequently done by other swages. One of the principal drawbacks in the manufacture of solid swages has been the difficulty experienced in properly hardening them at the bottom of the opening, which portion of swage does all the work, and requires to be hardened in the most perfect manner.

The Conqueror is hardened before the sleeve is driven on, and the hardening composition passes freely through the slots at the bottom of the openings, thus insuring an even and correct hardening in that portion of the swage where it is most required.

CHAMPION COMBINATION SAW GAUGE.

WHOLESALE HARDWARE MERCHANTS,

Eureka Patent Jointer, Raker Tooth Gauge and Side File Combined.....Per doz. Sets. $9 50

IMPROVED MITRE BOX.

MONTREAL, QUE.

This Mitre Box can be used with a Back Saw or a Panel Saw equally well. If a Back Saw is used, both links which connect the rollers, or guides, are left in the upper grooves, and the back of the saw is passed through under the links.

If a Panel Saw is used, the link which connects the rollers on the back spindle is changed to the lower groove; and then the blade of the saw will be stiffly supported by both sets of rollers, and work like a Back saw.

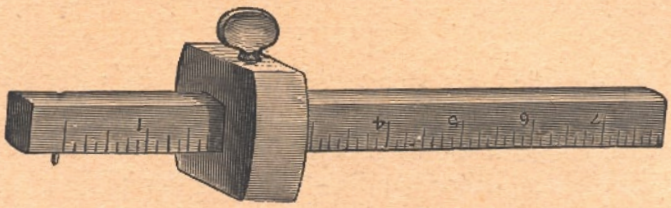

No. 50—Mitre Box, 20 inches.....Each. $11 20

STANLEY'S BUTT AND RABBET GAUGE.

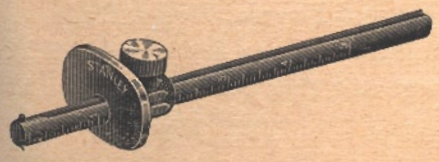

For Hanging Doors, Mortising, Marking, Etc.

This Gauge has two bars, both of brass, one movable within the other. The two steel blades or markers at the extreme end of the inner bar, can be moved to any position by means of thumb-screw at opposite end of Gauge.

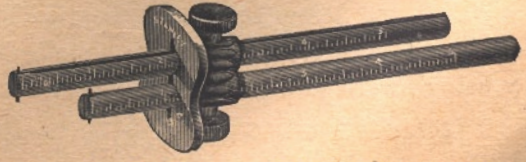

No. 92—Improved Butt and Rabbet Gauge, one in a box.....Per doz. $22 00

IMPROVED MARKING AND MORTISE GAUGES.

The steel points are attached very near the ends of the bars, to admit of being used close up into a rabbet or corner. The head of the Marking Gauge can be turned over for a broad or narrow bearing, as desired.

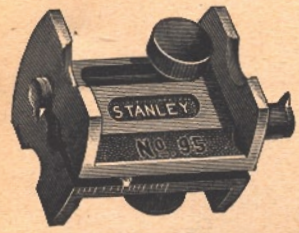

No. 90—Nickel-plated Marking Gauge, one in a box.....Per doz. $6 40

No. 91—Nickel-plated Marking and Mortise Gauge, one in a box.....Per doz. $12 40

CAVERHILL, LEARMONT & CO. WHOLESALE HARDWARE MERCHANTS, MONTREAL, QUE.

IMPROVED BUTT GAUGE.

A Metallic Butt Gauge, having one bar with two steel cutters fixed upon it. When the cutter at the outer end of this bar is set for gauging on the edge of the door, the cutter at the inner end of the bar is already set for gauging from the back of the jamb. The other bar has a steel cutter to accurately gauge for the thickness of the butt.

The form of this Tool is convenient for carrying in the pocket. It is so constructed that the bars cannot fall out of the stock.

No. 95—Nickel-plated Butt Gauge, one in a box.....Per doz. $14 40

SPIRAL SCREW DRIVERS.

Jones' Reversible Spiral Screw-Drivers.

This Cut Shows Spiral Extended—Length without Bit, No. 1, 16¾ in.; No. 2, 15 in.

This Cut Shows Spiral Closed—Length without Bit, No. 1, 11¼ in.; No. 2, 10 in.

These Cuts show Spiral Pushed in and Extended.—One-third size.

These Screw-drivers are made to drive or draw screws.

DIRECTIONS: Grasp swelled brass sleeve with left hand, and with right hand turn handle the direction you wish to drive the screw. When spiral is pushed in, it can be used as an ordinary Screw-driver.

The tube is of seamless brass, highly polished, and handles are of hard wood.

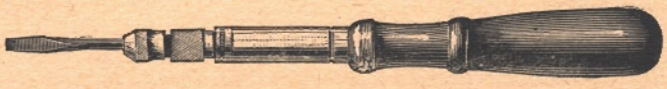

No. 1—Large size, with 3 Forged Steel Bits, length, extended, 17 inches; closed, 11 inches.. Per doz. $39.50
No. 2—Small size, " " " " 15 " " 10 " " 34.00

One in a wooden box.

Howard-Allard Spiral Screw-Drivers.

This Cut Shows Spiral Extended—Length without Bit, No. A1, 16¼ in.; No. A2, 11 in.

This Cut Shows Spiral Closed—Length without Bit, No. A1, 10½ in.; No. A2, 7¼ in.

These Drivers are made to drive screws; can be used as a ratchet, also as an ordinary when closed.

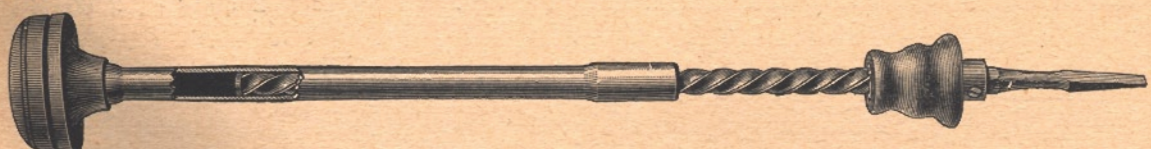

The tube is of seamless brass, highly polished, and handle is of hard wood.

No. A1—Large size, with 3 Forged Steel Bits, length, extended, 19¾ inches; closed, 12 inches, per doz. $26 50
No. A2—Small " " " " 14¼ " " 10¼ " " 24 00

One in a Wooden Box.

Reid's Lightning.

Can be used for running the Bit both backward and forward or to turn the Bit one way only. It is equally good for drilling wood or metal or for driving screws.

1

2

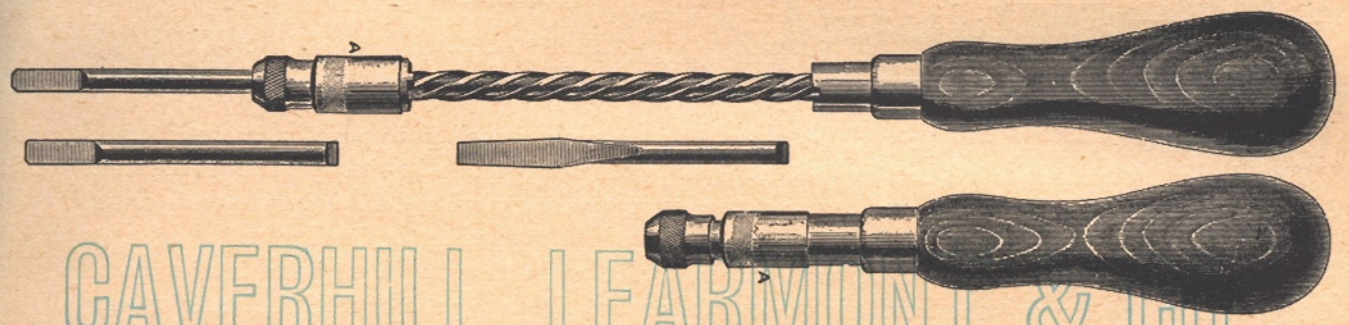

No. 1—With One Screw Driver Bit ..... Each, $3 70
No. 2— " Two Screw Driver Bits and one Boring Bit, Smaller Brace..... " 3 00

One (only) in a Box.

CAVERHILL, LEARMONT & CO., WHOLESALE HARDWARE MERCHANTS, MONTREAL, QUE.

AUTOMATIC INTERCHANGEABLE SCREW DRIVERS.

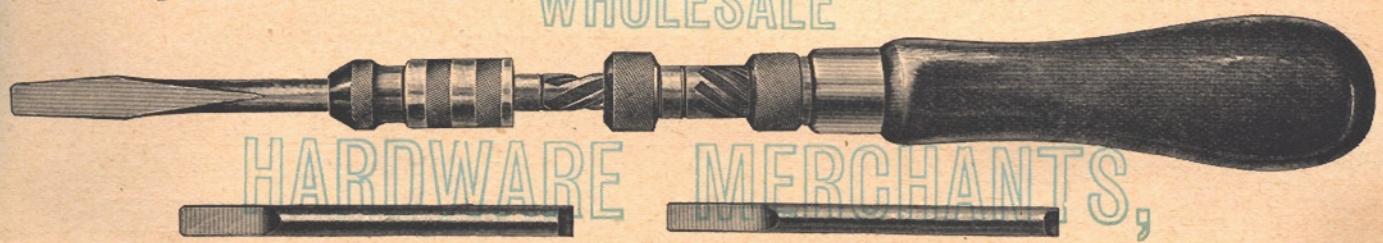

Goodell Patent.

1 and 2

Finely Finished, Stained Hardwood Handle with Steel Socket, Steel Spindle and Interchangeable Forged Steel Bits. This Tool may be used Automatically or as a Ratchet or Plain Screw Driver.

No. 1—Length, extended, 14 inches, each with Three Bits.....Per doz. $23 00
No. 2—Length, extended, 16 inches..... " 26 40

22

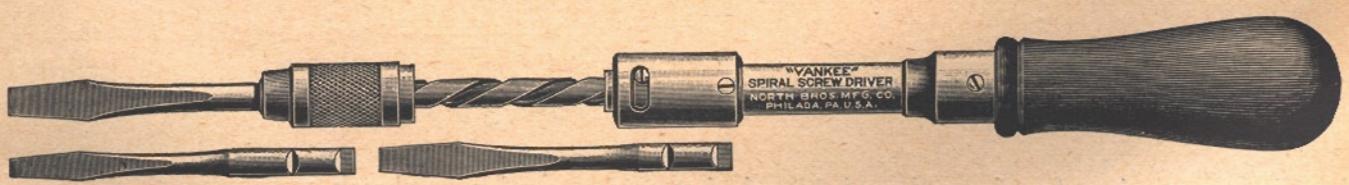

Most compact, the strongest, and in every way the most practical tool for both driving and drawing screws automatically, yet produced.

It has two separate and distinct spirals, each working entirely independent of the other.

No. 22—Automatic Screw Driver, each with Three Bits.....Per doz. $33 00

CAVERHILL LEARMONT & CO., WHOLESALE HARDWARE MERCHANTS, MONTREAL, QUE.

"YANKEE" SPIRAL-RATCHET SCREW DRIVER.

20

Right Hand only and Rigid.

This tool is made in three sizes, viz.:

No. 20—Size 1: Extreme length extended, including bit, 14 in., length of push or stroke, 4 in...Per doz. $21 30
No. 20—Size 2: " " " " " 17 in., " " " 5 in... " 24 00
No. 20—Size 3: " " " " " 19 in., " " " 6 in... " 27 00

Three bits are furnished with each tool. Packed One only in a Strong Paper Box.

JJ

"YANKEE" SPIRAL RATCHET SCREW DRIVER.

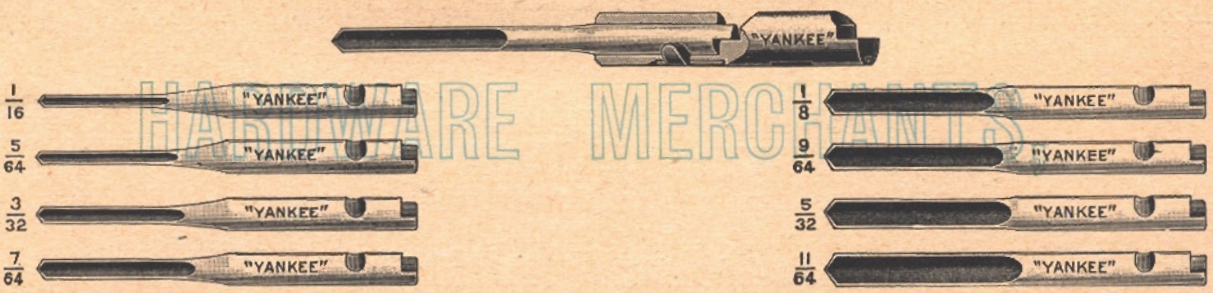

It can be used as a rigid screw driver in any part of its length, as well as to push or ratchet screws in or out.

The change from right to left hand for either push or ratchet is made by simply moving the slide to either end of the slot. When slide is moved towards the bit it works right-handed, either to push or ratchet the screw in—pushing the screw in as far as it will go—and without removing the hand from the driver or making any change whatever, turn the handle forward and backward and the screw is ratcheted into its place. When slide is moved to end towards the handle it works left-handed, either to push or ratchet the screw out.

No. 30—Length when closed with bit in chuck 13½ in. and 19¼ in. when extended, each with three bits.....Per doz. $32 00

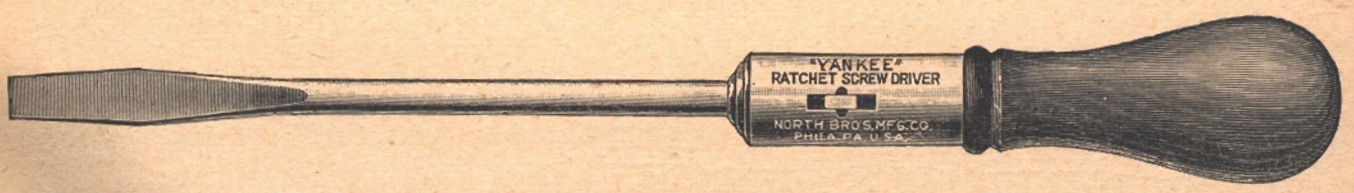

"YANKEE" CHUCK, WITH DRILL POINTS.

For use in No. 30 "Yankee" Spiral-Ratchet Screw Driver.

Eight drill points, 1/16 inch to 11/64 inch inclusive, are furnished with each chuck. The chuck and eight drill points are put up in a small wooden box. These are packed in Paper Boxes of One Dozen.....Per set $ 1 00

"YANKEE" RATCHET SCREW DRIVER.

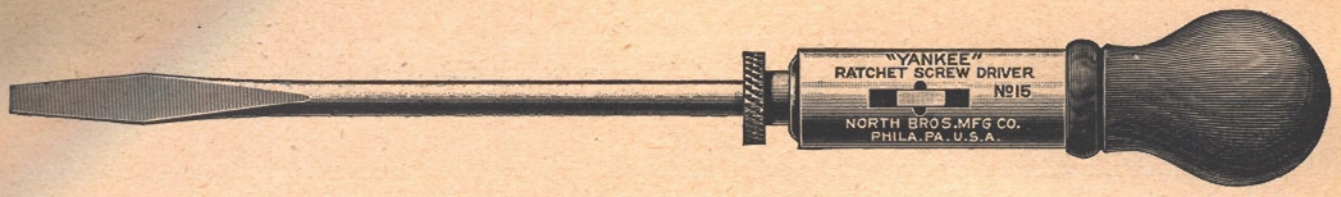

The construction of ratchet and pawls is such that neither can bend or break, wear or or get out of order, and permits a very compact arrangement, making the tool more convenient in size and shape.

The adjustment for right or left hand is exceedingly simple. For right hand or to ratchet a screw in, push the slide to end of slot towards bit; for left hand or to ratchet a screw out, push the slide towards handle of driver. If the slide is placed midway between ends of slot, the blade is held rigidly and the driver can be used as an ordinary screw driver with fixed blade.

Length,		2	3	4	5	6	8 Inch.
No. 10	Per doz.	$6 40	8 00	8 80	9 60	11 20	13 00

"YANKEE" RATCHET SCREW DRIVER

The Adjustment is the same as No. 10.

STEARNS' PATENT EXPANSIVE HOLLOW AUGER.

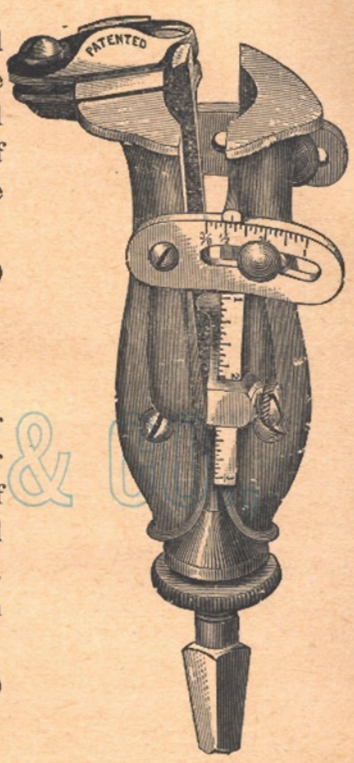

0

The jaws slide towards and from each other, and may be adjusted to any size from ¼ to 1¼ inches, to the scale upon head of tool. They are hardened steel, and are secured by screws working in the slots at side of cutter head. The adjustable stop and graduated scale upon the body regulate the length of tenon.

No. 0—Price .....Per doz. $90 00

Packed One-twelfth Dozen in a Box.

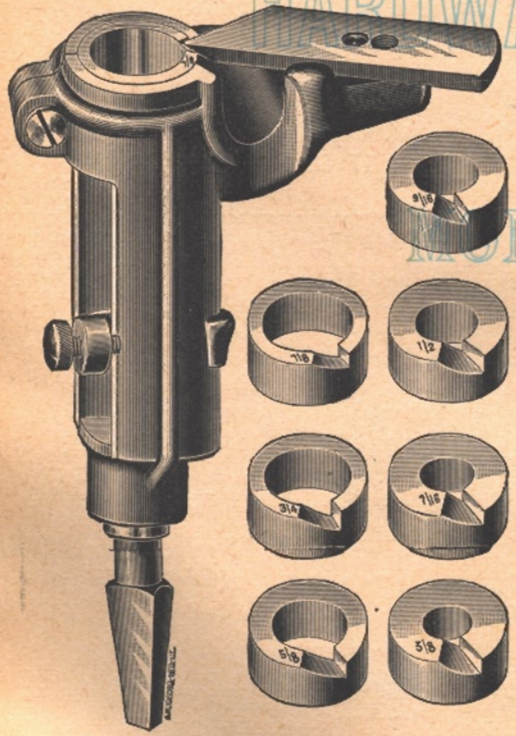

2

Made entirely of malleable iron and steel; has our adjustable stop and scale, with rulings to sixteenths for length, also graduated strap to indicate the diameter of tenon. The jaws, or sides, are pivoted, and are opened and closed by means of a conical nut upon the shank. It will cut any sized tenon ⅜ to 1 inch, and 3 inches in length. It has our patent adjustable cap and knife.

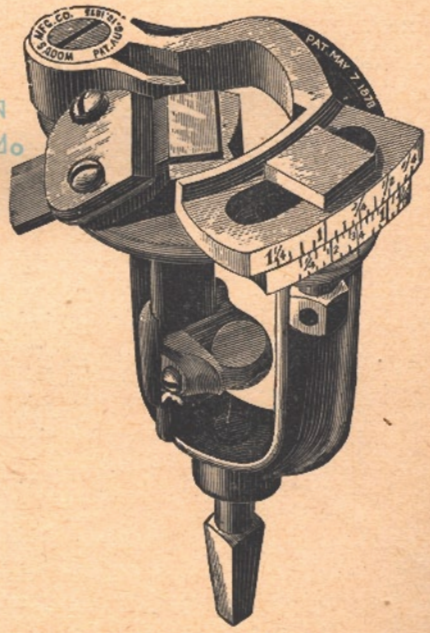

No. 2—Price .....Per doz. $90 00

Packed One-sixth Dozen in a Box.

PATENT ADJUSTABLE HOLLOW AUGERS

1

Wood's Patent.

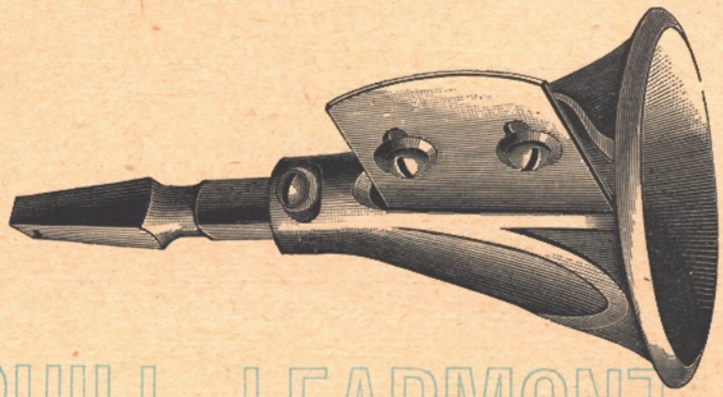

No. 1—Made of malleable iron and nicely finished. Knife of best tool steel; has our patent adjustable stop. Cuts eight sizes, as follows: ⅜, 7/16, ½, 9/16, ⅝, ¾, ⅞ and 1 inch.....Per doz. $90 00

Packed One-sixth Dozen in a Box.

"YANKEE" RECIPROCATING DRILL.

50

The movement or traverse of the driver is 8½ inches. The entire length of tool without drill is 16 inches.

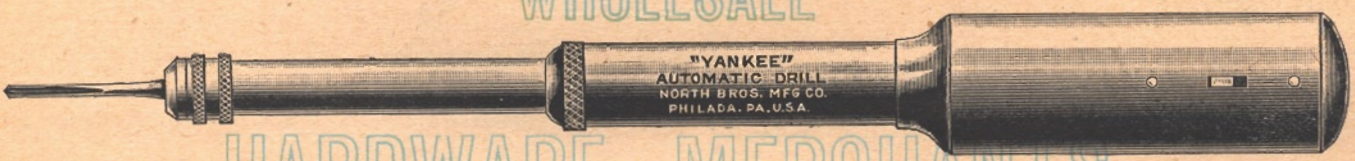

No drill points are furnished with this tool—the user furnishing such quality, style and size best suited for work required in wood, iron, steel, brass, etc. The chuck will hold any drill with shanks $\frac{3}{16}$ inch diameter or less. To open or close chuck move the driver up to chuck, push down the catch in lower end of driver, which holds fast the driver on spindle. After drill is put in chuck and tightened, push up the catch, releasing driver from spindle so it can be moved backward and forward to operate drill.

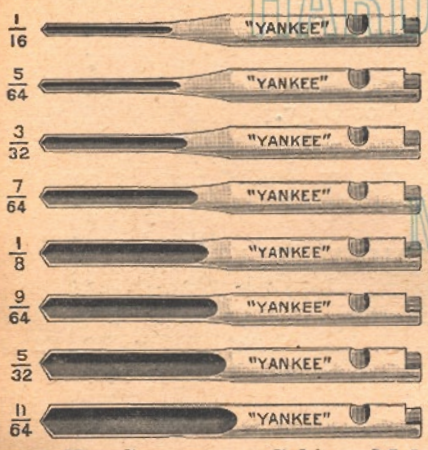

The materials and workmanship throughout are of the best, and each tool is guaranteed.

No. 50 .....Per doz. $49 50

One in a Box.

"YANKEE" AUTOMATIC DRILL.

Cut Showing Magazine for Drill Points, Open.

For Carpenters, Cabinet Makers, etc., for boring wood for various purposes, as setting screws, brads, nails, etc. Bores holes in hard or soft woods without splitting. Pushing handle down revolves the drill, and a spring pushes handle back to its place. During the return movement the drill point revolves backward to clear chips, etc.

The chuck is of new design, is stronger and will last longer than any now used in such tools. To insert drill the sleeve of chuck is turned to the left, the drill inserted and sleeve let go. If the sleeve does not return to its place, push on drill and turn in chuck until it does. In hard or tough woods this drill can be operated as a ratchet. The tool is made of brass, nickel plated and finely finished The material and workmanship throughout are of the best.

Eight drills are furnished with each tool, one each $\frac{1}{16}$, $\frac{5}{64}$, $\frac{3}{32}$, $\frac{7}{64}$, $\frac{1}{8}$, $\frac{9}{64}$, $\frac{5}{32}$, $\frac{11}{64}$ inch, shown full size in cut.

No. 40—The entire length of tool, inclusive of drill, as in illustration, is 10¾ inches.....Per doz. $31 00

WHOLESALE
HARDWARE MERCHANTS,
MONTREAL, QUE

The chuck is of new and improved design, and will hold drill points tight and absolutely rigid, and an improvement on chuck used on our No. 40 "Yankee" Drill.

The tool is nickel plated and finely finished. The material and workmanship throughout are of the best.

Eight drill points are furnished with each tool, one each, $\frac{1}{16}$, $\frac{5}{64}$, $\frac{3}{32}$, $\frac{7}{64}$, $\frac{1}{8}$, $\frac{9}{64}$, $\frac{5}{32}$, $\frac{11}{64}$ inch, shown full size in cut. They are same as used in No. 40 "Yankee" Drill.

No. 41—The entire length of tool, inclusive of drill, as in illustration, is $11\frac{3}{8}$ inches .....Per doz. $31 00

Packed One in a Strong Paper Box.

42

This No. 42 "Yankee" Drill is of same construction as our No. 41, but without any magazine for the drill points and a wood in place of metal handle, hence lower in price. The drill points are put up in a small round wooden box.

The chuck is of new and improved design, and will hold drill points tight and absolutely rigid, and is exactly same as that used on our No. 41 "Yankee" Drill, which is an improvement on that used in our No. 40 "Yankee" Drill.

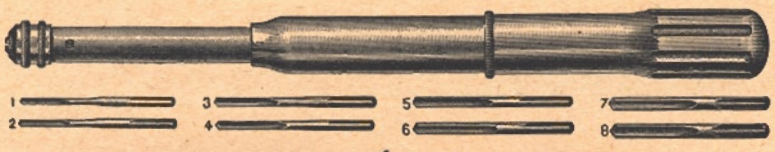

All metal parts other than the spiral spindle are nickel plated and finely finished. The material and workmanship throughout are of the best.

Eight drill points are furnished with each tool, one each $\frac{1}{16}$, $\frac{5}{64}$, $\frac{3}{32}$, $\frac{7}{64}$, $\frac{1}{8}$, $\frac{9}{64}$, $\frac{5}{32}$, $\frac{11}{64}$ inch. They are same as used in our Nos. 40 and 41 "Yankee" Drills.

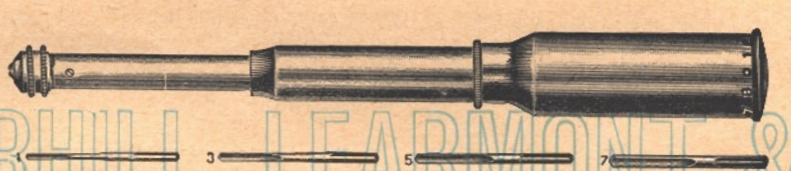

No. 42—The entire length of tool, inclusive of drill, as in illustration, is $11\frac{3}{8}$ inches..... .Per doz. $23 00

BLODGETT'S

Combination Twist Drill, Thread Pitch, Centre and Tap Drill Gauge.

No. 2. Gauge combines all of the features of our No. 1, with the addition of an inside, as well as an outside Thread Gauge.

Drill Gauge.—This Gauge contains the sizes from No. 1 to No. 60, and is broached to the American Standard of sizes, case-hardened to prevent wear, and numbered on face side in plain figures and will be found accurate.

Thread Pitch.—On the end of the blades containing the drill sizes, we have extended an arm, at an angle of 45 degrees, on which the pitch is cut, and is so constructed that it can be used for either inside or outside threads, and contains 24 pitches ranging from 8 to 72 threads per inch.

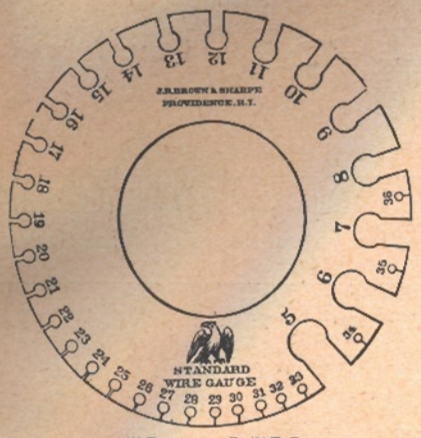

Tap Drill Sizes.—On the back of the blades against the proper size hole is stamped the proper size drill to be used for 10 sizes of Machine Screw Taps, ranging from 2-56 to 18-18, which feature will be found of great convenience.

Centre Gauge.—The Centre Gauge is divided into two parts, Male and Female, and placed at the back of the Gauge and can be conveniently found when wanted.

The addition of the finer threads running beyond 40 will be found of great convenience by machinists doing fine work.

No. 1.....Each $3 20
No. 2..... " 4 30

STUFFING ATTACHMENT

FOR

THE UNIVERSAL FOOD CHOPPER.

No. 2 Stuffing Attachment.

Attention is called to the new stuffing attachment for the Universal Food Chopper as shown in the illustrations. The stuffing attachment is made of one piece of seamless brass tubing spun into the shape required, heavily nickel plated and finely finished. A thread on the end of the barrel of the machine fits in the end of the stuffing attachment.

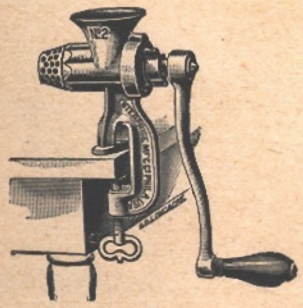

To use the stuffing attachment, rig the machine up with 3 tooth cutter and thumb nut, put the stuffing attachment right over these and screw it on to the end of the machine.

No. 2 and **3** Stuffing Attachments.....Per doz. $4 50

Crown Ice Chipper.

Gem Ice Shave.

MONTREAL, QUE.

Crown Ice Chipper Wood Handle, Polished Steel Blade, Galvanized Guard.....Per doz. $9 00

Length over all, 10 inches.

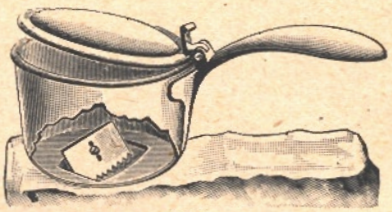

Gem Ice Shave.....Per doz. $9 00

Is a simple and efficient tool for shaving and collecting ice from blocks without moving the latter from their place in a refrigerator or other receptacle. As shown in cut, it is constructed like an ordinary plane, made of galvanized cast iron, having in front of the knife a receptacle closed by a lid, in which the ice shaved off collects, as the shave is moved forward and backward over the surface of a block of ice. Being quite short, the shave can be conveniently used on ice laying in a refrigerator; when receptacle is filled, raise the lid and empty the contents, which will be found fine as snow, repeating the operation till the required quantity is obtained. By means of the set-screw at back of the shave, the knife can be set further in or out, and thus regulate the fineness of the ice shaved off.

Rapid Lemon Squeezers.

No. 70.....Per doz. $90 00

Automatically presses and revolves the lemon on the Cone, extracting all the juice with one motion.

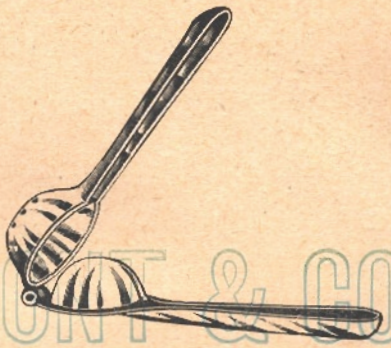

The Cup and Cone are covered with sheet aluminum metal, which is not affected by the acid of the lemon.

The Cup and Cone form a strainer which will not clog. The parts are easily removed for cleansing. The Glass Holder is adjustable to any height.

40 qt., without Pulleys. Copper Can.. .. ..

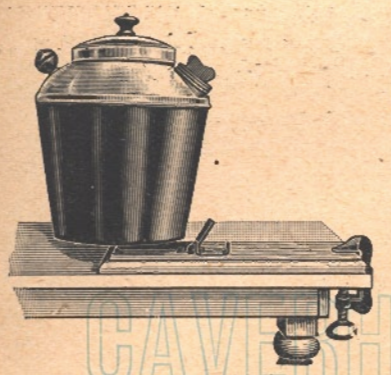

Weight, 575 lbs.

This is an improvement on the ordinary Seaman and Philadelphia Freezers, so long and favorably known to confectioners and manufacturers of ice cream.

Prices on application.

THE IDEAL ICE CREAM FREEZER.

It is light and convenient.

Has Indurated Fibre Tub, which is the best non-conductor of cold or heat known.

No hoops to fall off.

No staves to shrink or swell.

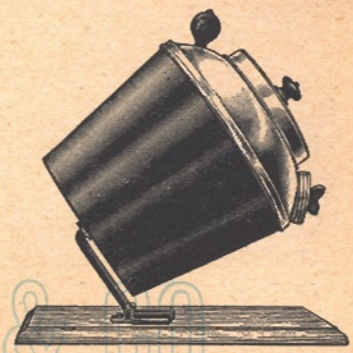

No wooden tubs with leaky seams.

No denting of can from lumpy ice.

No wearing friction between ice and can.

No overflow from the tub to slop the floor.

No repacking necessary to keep cream 5 hours.

In position for freezing.

Only need to fill ice compartment once.

Only requires 15 pounds of ice and 5 pounds of salt to do the work of an old style gallon freezer. A saving of 50 per cent. in ice.

Only four minutes to fill ice compartment—less than half the time to fill an old style gallon freezer.

Impossible for liquefied ice and salt to ever get into the cream. Simple in construction; easy in operation; rapid in results. The most practical, satisfactory and durable ice cream freezer ever offered for domestic use.

It freezes quicker, it operates easier, uses less ice, and gives better results than have ever been obtained before.

CAVERHILL, LEARMONT & CO.,

"RAPID" CORK PULLER.

WHOLESALE

The Rapid is the most simply constructed and easily operated machine in use.

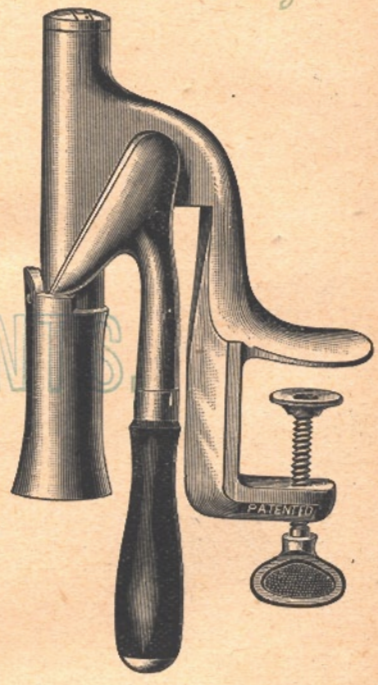

It never breaks a bottle, as the strain is on the strongest part of the glass.

It is so made that any part may be replaced, without returning the machine to the factory.

It cuts the wires and draws the cork of an ordinary Ale, Wine or Mineral Bottle with one movement.

No. 28.....Each $5 60

HARDWARE MERCHANTS,

ENTERPRISE IMPROVED PATENT SUCTION AND FORCE MEASURING FAUCET.

Tinned.

MONTREAL, QUE.

No. 61—For Molassss, Thick Oils, Tar, etc..... $3 00

Warranted to measure correctly and draw a gallon of molasses in winter in one minute. The only measuring Faucet ever invented which has stood the test, having had its durability and economy proven by years of experience.

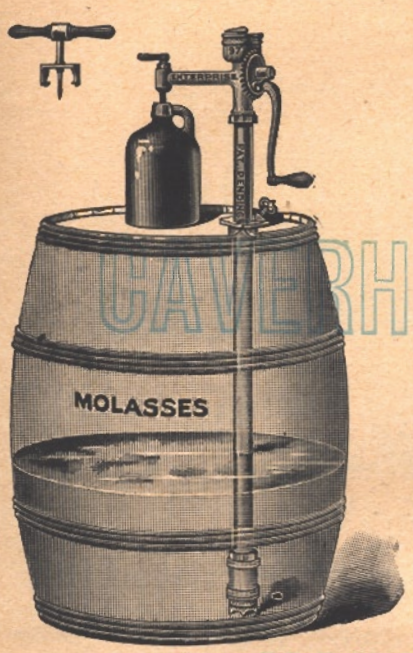

No grocer can afford to be without it.

Advantages over the Old Style Molasses Gate.

1st. **It saves time,** as it draws molasses, winter and summer, directly into a jug or bottle without the use of a funnel.

2nd. **It is cleaner,** as it dispenses with the use of measures, and is consequently free from flies and dirt.

ENTERPRISE SELF-PRIMING AND MEASURING PUMP

197

With New Total Registering Device.

For Measuring Molasses, Heavy Oils, Tar and other Thick Liquids.

Each revolution of the Crank Pumps a Gill, 4 revolutions a pint, etc.

No Priming is Necessary. Simply insert in the barrel and it is ready for use.

Has a patent Clamp, operated by a Thumb Screw only, to fasten to barrel.

Extreme Length, 54 inches.

No. 197—Pump and Auger $6 00
No. 197—Pump only 5 50
No. 197—Auger only 0 60
Extended Tube—Per foot or fraction thereof 0 50

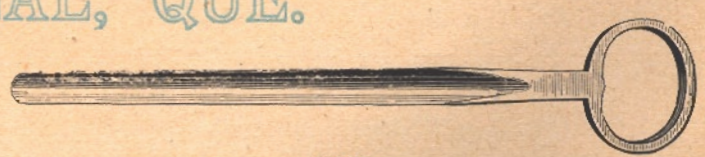

The new total Registering Device, indcating quantity taken from barrel from time to time, will enable the grocer to anticipate his order for a fresh supply.

KEYSTONE DEHORNING CLIPPER.

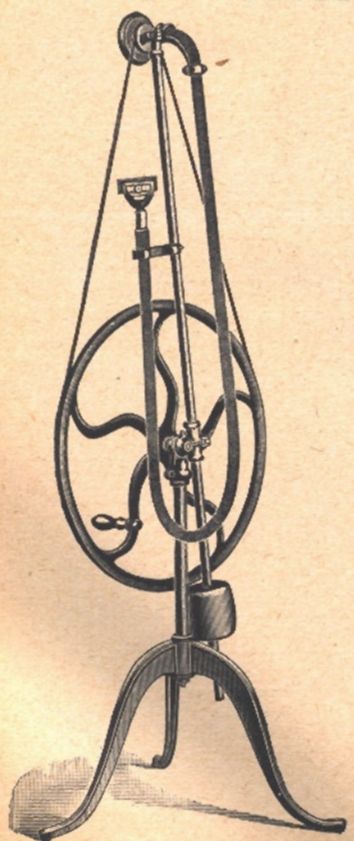

The Keystone Dehorning Clipper.....Each $10 00

The Keystone Dehorning Clipper was gotten up to fill the want of an easy, practical and scientific method of removing the horns from cattle, felt by the farmer, dairyman and veterinary surgeon. As every one pronounced it such a complete success and so far ahead of anything before used, it has been placed on the market to fill this demand. This instrument is fully guaranteed in every particular, except blades, which will be furnished at 75c. each.

HAND-POWER HORSE CLIPPERS.

BALL BEARINGS.

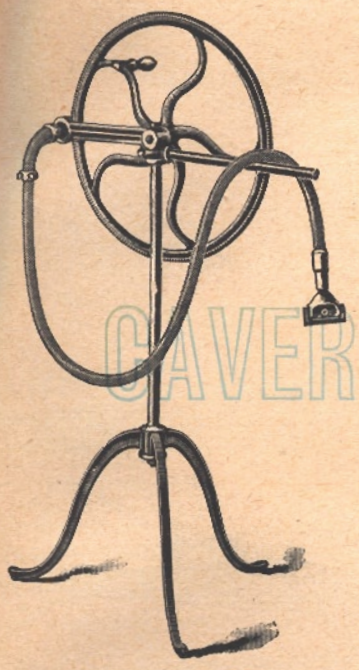

No. 429—Coates.....Each $52 00

"The Winner" is the height of perfection for those doing a moderate clipping business. Furnished with five feet of Coates patented all tempered steel flexible shaft. The base is made in sections so that when it is knocked down it occupies very little space. The balance wheel is 24 inches in diameter; of sufficient weight to make an easy running machine. The machine proper is swiveled at the balance wheel head, thus allowing of an unlimited radial reach. Weighs 50 lbs. and is furnished with Coates standard cutter head complete, and an extra set of cutters.

HAND-POWER HORSE CLIPPERS.

BALL BEARINGS.

No. 529—Coates, with a 5 ft. No. 22 Flexible Shaft..... Each $42 00

"The Wizard" is designed for those having a moderate clipping business. The power is developed from a large spur gear working into a pinion. The Standard is built upon the same principle as the No. 429. This machine complete weighs only 35 lbs., and may be knocked down so as to occupy very little space in transportation. Furnished with Coates Standard Ball Bearing Cutter Head and extra set of cutters. Guaranteed to be the best clipper on the market for the money.

HARDWARE MERCHANTS,

WIRE STRETCHERS.

"LITTLE GIANT" WIRE STRETCHERS.

By a Self-Adjusting Slotted Latch, the Stretcher may be used either side up, that is, on either side of the post, or at either end of the wire, the crank turning at all times in one direction, which is necessary, for reversing the crank would reverse the rope. Place the rope around the post, hook the lip eccentric at the end of the rope to the wire, and wind up. For splicing wire, place one end of the wire under the lip eccentric on the frame and the other end to lip eccentric at end of rope, then draw them together and splice. It is not necessary to hold it up with one hand and undertake to turn the windlass with the other.

STEAM SHEET PACKING.

WITH CLOTH INSERTION.

This article is now considered indispensable by Engineers and Machinists wherever steam, air or water joints are to be made, as no substance has so much elasticity and stands so high a degree of heat.

Cloth Insertion—Cloth on One or Both Sides.

Thickness.	One-Ply.	Two-Ply.	Three-Ply.	Four-Ply.
1/64 inch, per lb	70 cts.	.....	.....	.....
1/32 " "	65 "	.....	.....	.....

1/8 " "	.....	55 "	58 "	61 cts.
3/16 " "	.....	.....	55 "	58 "
1/4 " "	.....	.....	.....	55 "

There is one-ply of cloth to every 1/16 inch thickness.

Three Cents per pound additional will be charged for each extra ply of cloth.

The cloth, whether used as an insertion or on the outside, counts as one-ply.

All Cloth Insertion or Plain Packing is made in Rolls about one yard wide, and 20 yards long.

GIBBS POST HOLE DIGGER.

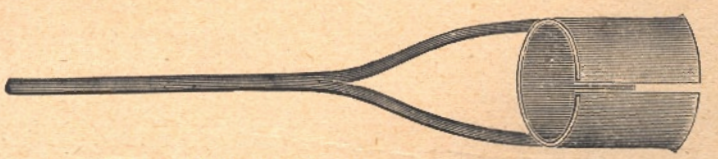

BEST GENERAL PURPOSE DIGGER MADE.

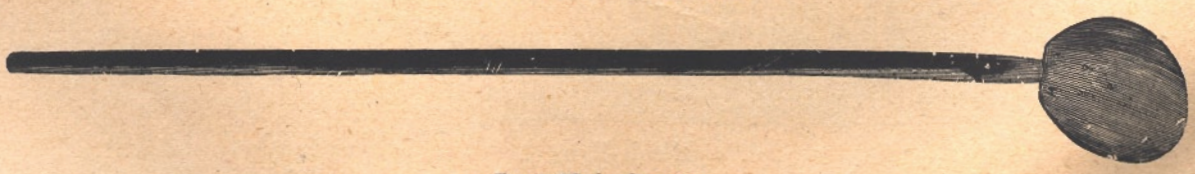

Total Length	5 feet 5 inches.
Weight	10 pounds each.
Price	Each $4 00

ADVANTAGES: Easiest operated. Very durable. More soil can be brought out at one time and with less labor. Scours or cleans better in mucky soil. All wearing parts have steel pins. Blade is made of best tempered cast steel; the rod and yoke are also steel. Only one blade to keep sharpened. Makes a hole of any desired diameter. By the use of the compound lever operating blade, ordinary stones that obstruct digging are readily loosened and removed.

COMMON SENSE POST HOLE DIGGER.

Common Sense, 5½ inch Diameter, Handle 50 inches long ..... Per doz. $22 00
Weight per Doz. 150 lbs.

TINPLATE WEIGHTS—NET AND GROSS

Nominally, a box of IC 14 x 20, 112 sheets, weighs 108 lbs. net, but actually 107 lbs. is a very good average weight, though good Charcoal Plates should run rather heavier. The following table gives approximate net and gross weights of the standard sizes.

Substance.	Size.	Sheets.	Net Weight.	Gross Wt.	Thickness on B.G.	Substance.	Size.	Sheets.	Net Weight.	Gross Wt.	Thickness on B.G.
ICL 80 lbs.	14 x 20	112	80 lbs.	86	32.5	IXX	14 x 20	112	156 lbs	165	26.8

USE OF THE DIFFERENT GAUGES.

British Imperial Standard Wire Gauge.—It came into use as the legal Wire Gauge of Great Britain on March 1st, 1884. Also used for Tubes, Copper and Brass Sheets.

New Birmingham Gauge.—It was issued by the South Staffordshire Iron Masters' Association, March 1st, 1884, for the use of Sheet and Hoop Iron makers, and unless another gauge is specially agreed upon, English Sheets and Hoops are made to this gauge.

Stub's Gauge.—Sometimes called Warrington Wire Gauge, and largely used in Great Britain and the United States. It is the Standard for Telegraph Wire in the United States, and is also taken as the Standard by the Canadian Customs Department.

Brown & Sharpe's or American Standard Wire Gauge.—It is used to a great extent for gauging Wire and Sheets for Electrical purposes in the United States and Canada.

Washburn & Moen's Gauge is used by the American Wire Mills as the Standard for ordinary Iron and Steel Wires.

The U. S. Plate Gauge is the Standard for Sheet Iron and Steel in the United States.

Centiare (=un mètre carré)	1.196033 sq. yards.	Decigramme (=dixième de gramme)	1.5432 grain.
Litre (=un decimètre cube)	1.760773 pint.	Centigramme (=centième de gramme)	0.15432 grain.
Decalitre (=dix litres)	2.2009668 gallons.	Milligramme (=millième de gramme)	0.015432 grain.
Hectolitre (=cent litres)	22.009668 gallons.		

Rule for Estimating the Approximate Weight of any Piece of Iron.

One cubic foot of Iron	480 lbs.	One square inch, one foot long	3⅓ lbs.
One square foot, one inch thick	40 "	One square inch, one yard long	10 "

RULE :—Ten times the sectional area in square inches is equal to the weight in pounds per yard.

Thus, a bar 3 x ⅜ in. = 1⅛ square inches = 11¼ lbs. per yard or 3.75 per foot.
Steel is about 2 per cent. heavier than above.
The area of a round bar is about three-fourths that of a square bar of the same size.
The circumference of a circle is about 3½ times its diameter.

NATIONAL PREPARED HOUSE PAINTS.

These Paints are manufactured from the best and purest materials, combined with Linseed Oil. 30 different shades to select from.

Ivory Black, Inside and Outside White. Put up in One and Two Pound Tins, at 7½ cents per lb., Quarts, Half and One Gallon Cans at $1.10 per Gallon.

ISLAND CITY LIQUID OXIDE ROOFING PAINTS.

Specially prepared for ROOFS, BRIDGES, IRON and all outside work. RED, PURPLE, BROWN, SLATE.

Put up in Buckets at $1.30 per Gallon, and Barrels at $1.20 per Gallon.

BARN PAINT—BROWN AND SLATE COLOR.

A cheaper grade than the above put up in Buckets at $1.30 per Gallon and Barrels at $1.20 per Gallon.

ISLAND CITY GLOSS CARRIAGE PAINTS.

Dry quickly with a brilliant Gloss. Varnishing unnecessary. Put up in Lever Top Tins.

1-16 Gallon..... $0.40 | ⅛ Gallon..... $0.60 | ¼ Gallon..... $1.00

Sample Cards show 6 Colors.

ISLAND CITY PREPARED KALSOMINE AND FRESCO TINTS.

In 12 Colours, also White, put up in 5 lb. packages, 6 cents per lb.

ISLAND CITY ENAMEL PAINTS.

No. 370—"American" Side Snap, Decarbonized Steel Barrel, Nickeled Frame, Rebounding Lock, Polished Walnut Pistol Grip Stock and Fore-End, Choke Bored, 12 Gauge..... $ 7 75

HARDWARE MERCHANTS,
MONTREAL, QUE.

No. 371—"Shattuck" New Model, Top Snap, Blued Steel Barrel, Walnut Stock, Pistol Grip, Rebounding Lock, Patent Fore-End, Nickeled Frame, Choke Bored, Double Bolts, 12 & 16 Gauge..... $ 8 25

No. 381—Remington Semi-Hammerless, Top-lever, 30 in. Blued Steel Barrel, Rebounding Lock, Side-cocking Lever, Case-hardened Frame, Rubber Butt Plate, Pistol Grip, Choke Bored, 5¾ lbs., 12, 16 & 20 Gauge..... $11 50

BREECH-LOADING GUNS.

SINGLE BARREL.

No. 500—The Iver Johnson Automatic Ejector Top Snap Single Gun, 12 and 16 Gauge $9 25

Features: Automatic ejector, or non-ejector top-snap, two-piece, take-down gun, quick and positive in action; a safety device that prevents gun from being fired when at full cock; can be taken apart without removing stock; the barrel is locked in place by a bolt, lever and cam; when cam is released, the bolt removed, the gun is apart; has fewer parts than any top-snap single gun made; for instance—the mainspring operates the hammer, trigger and rebounding lock; has a single locking bolt; centre fire; rebounding lock; a barrel catch that will take up wear and gun remains tight; a short top lever, with light tension; barrels of best quality, high carbon steel.

If automatic action is wanted, which is desirable when paper shells are utilized, loosen the set screw by turning it to the left until its head is flush with the barrel lug.

No. 501—The Iver Johnson Semi-Hammerless Automatic Ejector Single Gun, 12 and 16 Gauge..... $11 25

(Trigger Action, neither Top nor Side Action.)

Finish: Case-hardened frame; highly polished black walnut pistol grip stock; black walnut fore-end, steel tipped, hard rubber butt plate; browned finish barrel; blued guard; case-hardened trigger, hammer, barrel catch and fore-end piece.

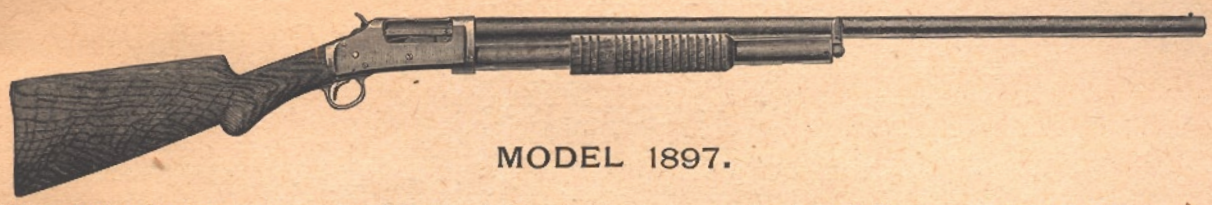

New Features: A small set screw which makes the gun either automatic ejector or non-ejector, at the option of the user. This screw is so fitted that it presses against the ejector spring and locks it. Nothing could be more simple. To be made non-ejector in action, the screw is left tightly screwed in its place. This action is particularly desirable when brass shells are used.

If automatic action is wanted, which is desirable when paper shells are utilized, loosen the set screw by turning it to the left, until its head is flush with the barrel lug.

Another attractive feature to be found on the Iver Johnson Semi-Hammerless Gun is a flush head locking bolt, taking the place of the protruding style formerly used. This is operated by pressing a small lever under the gun which releases itself from a groove in the bolt and allows the latter to be easily removed. The fact of this lever being under the gun, out of the way, is desirable.

By using a flush head bolt, a perfectly smooth surface is obtained for a hand rest. Furthermore, it adds greatly to the appearance of that section of the gun.

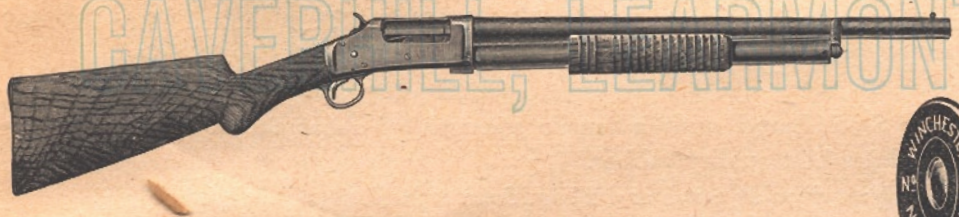

WINCHESTER REPEATING SHOTGUNS.

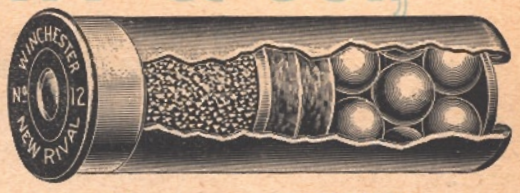

MODEL 1897.

No. 1588—Solid Frame, 30-inch Rolled Steel Barrel, Pistol Grip Stock and Fore end of Oiled Walnut; Weight, about 7¾ lbs.; 6 shot; Length of Stock, 13¼ ins.; Drop at Comb, 1⅝ inch; Drop at Heel, 2½ inch. Full Choked, using 2⅝ and 2¾ inch Shells, 12 Gauge..... $25 00

MODEL 1897 "RIOT" GUN.

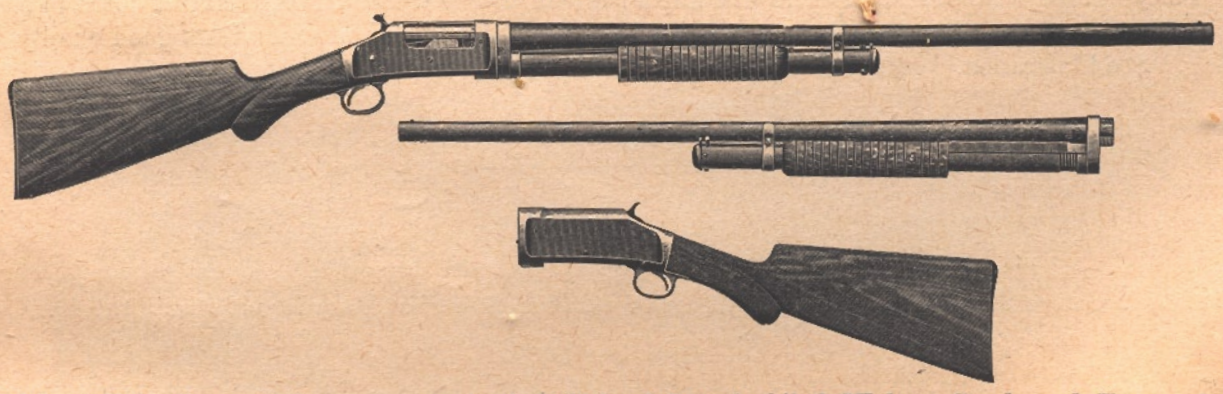

Buckshot Cartridge.

No. 1589—The Winchester Model 1897 "Riot" gun is made with a 20-inch rolled steel cylinder bore barrel, bored expressly to shoot buckshot. These guns are used by sentries in the U. S. Army, express messengers, watchmen, prison guards, train hands, and by many people for home defense. They are far superior to a revolver for shooting in the dark, where aim is uncertain, as a buckshot cartridge contains nine bullets to one contained by a revolver cartridge. The "Riot" gun has the same action as the regular Model 1897. The magazine holds five cartridges, which, with one in the chamber, makes a total of six at the command of the shooter. 12 Gauge..... $25 00

THE WINCHESTER "TAKE-DOWN" REPEATING SHOTGUN.

MODEL 1897.

No. 1590—"Take-Down" Pattern, 30-inch Rolled Steel Barrel, Oiled Walnut Stock and Fore-end, Pistol Grip. Weight, about 7¾ lbs.; 6 shot; Length of Stock, 13¾ ins.; Drop at Comb, 1⅝ inch; Drop at Heel, 2½ inch. Full Choked, 12 and 16 Gauge..... $27 00

The Winchester "Take-Down" Repeating Shot Gun is a strong, simple and serviceable arm. Its features are no small pieces or springs to fall out, ease of operation. Can be carried in a trunk. Will make a pattern of 290 No. 7 shot in a 30-inch ring at 40 yards.

MARLIN TAKE-DOWN REPEATING SHOTGUN.

MODEL 1898.

CAVERHILL, LEARMONT & CO.,

No. 1595—12 Gauge Shotgun, Grade "A," 30 in. Barrel, 6 Shots, Weight 7½ lbs., Full Choked $32 50

Grade "A."

This Grade Gun has Special Rolled Steel Barrel with a tensile strength of about 66,000 pounds to the square inch. Frames are blued. Buttplates best quality rubber.

Regular stocks, 13½ in. long, with 1⅝ in. drop at comb and 2½ in. drop at heel.

All guaranteed to target better than 325 pellets in a 30 in. circle at 40 yards, using 1¼ ounces No. 8 chilled shot.

WHOLESALE

Specially bored for smokeless or black powders, and fully proved with excessive loads.

Magazine holds 5 shells and with one in chamber gives 6 shots.

HARDWARE MERCHANTS

No. 1598—12 Gauge Shotgun, Grade C, 30 in. Barrel, 6 Shot, Weight 7⅛ pounds, Full Choked..... $52 00

Grade "C."

MONTREAL, QUE.

This Grade Gun has our "Special Smokeless Steel" barrel, the finest quality we can buy, and made specially for us for this use. It has a very high elastic limit and a tensile strength of about 100,000 pounds to the square inch. Special care is given to the boring and finishing of this grade. The stock and forearm are of selected fancy-figured walnut, and an extra fine finish is given to the wood. The stock and forearm are neatly checked by hand, as shown in cut, and the action is tastily relieved and ornamented with a good quality of hand engraving. See illustration.

No. 1599—12 Gauge Shotgun, Grade D, 26, 28 or 30 in. Barrels, 6 Shot, to order only .....

Grade "D."

This Grade Gun has a high quality Damascus barrel, specially bored and finished. The stock and fore-end are of the finest imported "Circassian Walnut," finished by the London process of filling, giving a rich, dull surface that does not glisten nor shine, and does not show scratches as plainly as the highly polished wood. The stock and fore-arm are checked with the finest possible hand work. The frame is elaborately engraved with fine quality hand work. Screws and trigger are of tool steel, heavily gold plated. This is the finest repeating shotgun built.

DOUBLE BARREL BREECH-LOADING GUNS.

NOTE.—All 10 Gauge Guns have 32 inch Barrels, and weigh from 8½ to 9¾ lbs. 12 and 16 Gauge have 30 inch Barrels, and weigh from 6½ to 8½ lbs 20 Gauge have 28 inch Barrels, and weigh 6½ to 7 lbs.

STEVENS' TAKE-DOWN RIFLES.

Crack-Shot.

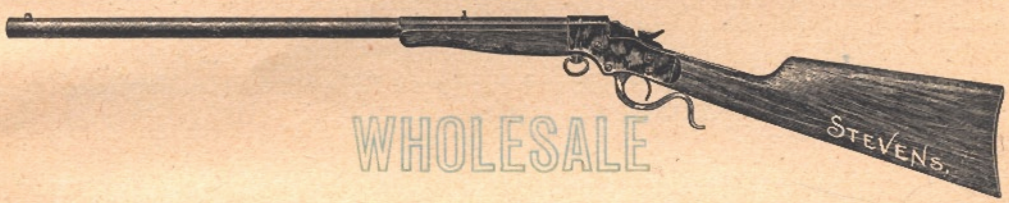

No. 16—.22 Calibre, 20 in. Round Barrel, Walnut Stock and Fore-end ..... $ 4 00

The new "Crack-Shot" has all the good features of any of the best rifles now on the market. Guaranteed —Quality, Finish, Accuracy, Style and Stability, as well as compactness in this rifle, and have no hesitation in recommending it.

This new rifle is made to shoot .22 Short Cartridges only, and is especially adapted and rifled for this special cartridge. Made with 20 in. barrel. It weighs about 4 lbs.

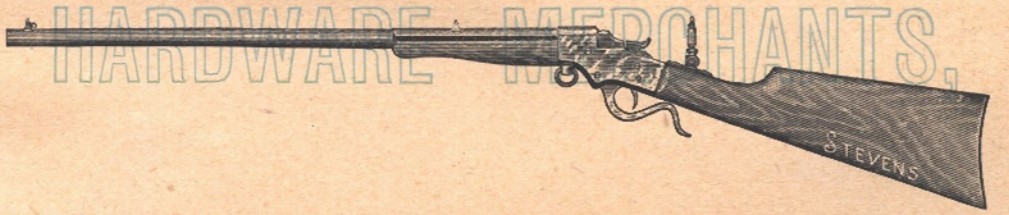

CAVERHILL, LEARMONT & CO.,

"FAVORITE"

WHOLESALE

No. 17—Plain Open Front and Rear Sights. For following Rim Fire Cartridges: .22 Long Rifle, 25 Stevens, 32 Long, .22 Long Shot and .32 Long Shot ..... $ 8 00

HARDWARE MERCHANTS.

No. 18—Beach Combination Front Sight, Open Rear and Vernier $11 25

No. 19—Lyman Front. Open Rear and Lyman Peep Sights 12 00

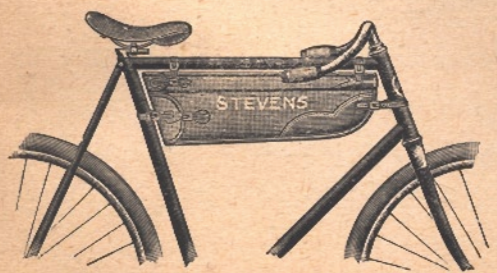

MONTREAL, QUE.

For following Rim Fire Cartridges: .22 Long Rifle, .25 Stevens, .32 Long, .22 Long Shot and .32 Long Shot.

To one stock and frame may be fitted barrels of three different calibres, viz.: .22, .25, or .32 calibre rifled barrels, and also .22 and .32 calibre shot barrels. One breech-block answers for both the .22 and .25, but for the .32 rifle or shot cartridge an extra breech-block and lever are necessary. The "Favorite" cannot be supplied to use centre-fire cartridges. It is made for the .22 Long Rifle, .25 Stevens and 32 Long Rim-fire only. The short, long and conical can be used with good results in rifles chambered for the .22 Long Rifle.

BB caps and shot cartridges should never be used in .22 calibre rifled barrels. The .32 Short Rim Fire Cartridges can be used satisfactorily in rifles chambered for the .32 Long Rifle.

A FAVORITE BICYCLE RIFLE.

It will be readily observed that this is a most convenient rifle for bicyclists. The barrel is 20 inches in length, otherwise the rifle is our regular "Favorite." The canvas case (herewith shown) is a strong case of first quality canvas, nicely bound with leather, with heavily reinforced ends. It will be found durable and fits snugly within the diamond frame, so that the rider is never inconvenienced by the rifle, in fact, hardly knows it is there.

No. 21—Price of Bicycle Rifle with 20 in. Barrel, .22 Cal ..... $ 8 00

Price of Canvas Bicycle Case 1 60

STEVENS' IDEAL SPORTING AND HUNTING RIFLES.

HARDWARE MERCHANTS,

MAUSER MAGAZINE SPORTING RIFLES.

MONTREAL, Q.U.E.

Calibre, 7 M/M.; Range, 2,500 yards. Flat Trajectory at 250 yards

Some of the points of merit in the Mauser Rifle are: Simplicity of construction, preventing liability of easily getting out of order. Cartridges lie free in magazine. Magazine is closed on under side, making it impossible for dirt or dust to enter. Mechanism can be easily taken apart. Can be used as a single shooter. Premature discharge impossible, owing to peculiar construction of the trigger device. All parts are interchangeable.

PRICE LIST.

No. 1—Mauser Rifle, 7 M/M., with Swivels and Sling, Round Barrel, 24 in. long; Weight, 7¼ lbs..... $30 00

WINCHESTER RIFLES.

But One Quality of Winchester Guns.—There is but one grade of Winchester guns, and that is the best. There is absolu ely no difference in the quality of the materials used in the highest and lowest priced Winchester guns. Neither is there any distinction m de in the tests to which the different priced guns are subjected for strength, accuracy and manipulation. The difference in price of the various styles of the different models of Winchester guns is due to the difference in exterior finish, ornamentation, or special features, which necessitate a greater amount of handwork than the standard styles. The finish on Winchester guns is unexcelled, being even superior to that of the most famous gun makers of Europe, who charge exorbitant prices for their work.

WINCHESTER MODEL 1900 SINGLE SHOT RIFLE.

CAVERHILL, LEARMONT & CO.

No. 709—The Winchester 22 Calibre Rim Fire, 18 in. Round Barrel, 2¼ lbs..... $5 00

The Winchester Model 1900 Single Shot Rifle is a serviceable, low-priced gun, designed to handle 22 Short or Long Rim Fire Cartridges. "Take Down" Model. The barrel of the Rifle is bored with same care and exactness as on the larger Calibre Winchester guns.

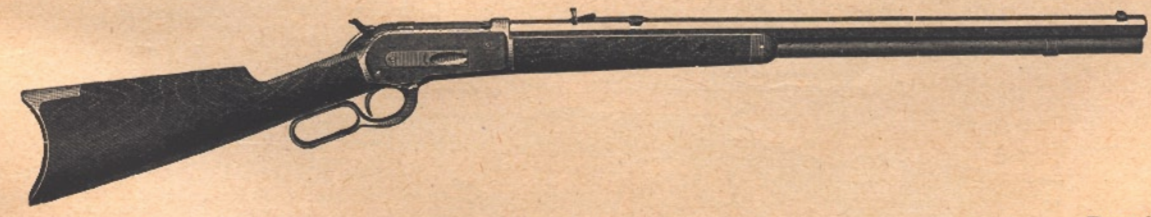

SINGLE SHOT WINCHESTER SPORTING RIFLE.

	Round.	Octagon.
No. 692—Model 1886, 45 Cal., 12 Shot, 26 in. Barrel, using 45-90 Win. C. F. Cartridges.....	$19 50	$21 00

Weight with Round Barrel, 9 lbs.; Half Octagon and Octagon, 9¼ lbs.

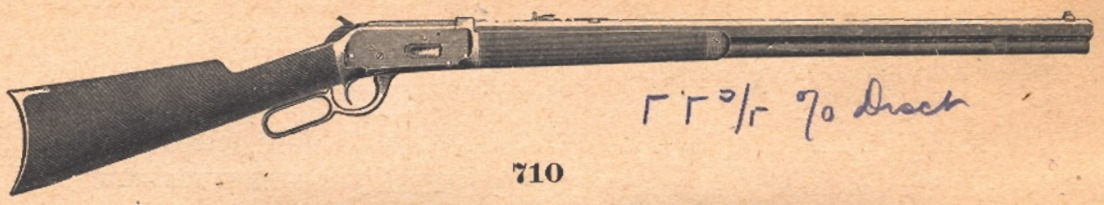

The magazine is filled while the gun is closed, through the spring cover at the side, and is provided with a stop, which permits the use of cartridges of different lengths, having the same length of shell. For illustration: Guns chambered for the .45-90 cartridge will handle the .45-85-350 solid ball, .45-82-405 solid ball, or the .45-85-300 hollow-point express bullet cartridges. In reloading cartridges, use the Winchester No. 2½ primer only. Never use in this gun a cartridge primed with a Berdan or copper primer. A rifle with a 26-inch barrel and full magazine will carry eight .45-90 Cartridges.

Complete Winchester Catalogue on application.

WINCHESTER REPEATING RIFLES

In Ordering Repeating Rifles, state whether Round or Octagon Barrels are Wanted.

Weight, Round Barrel, 7¼ lbs.; Octagon Barrel, 6⅞ lbs.

Complete Marlin Catalogue on application.

STEVENS' PISTOLS.

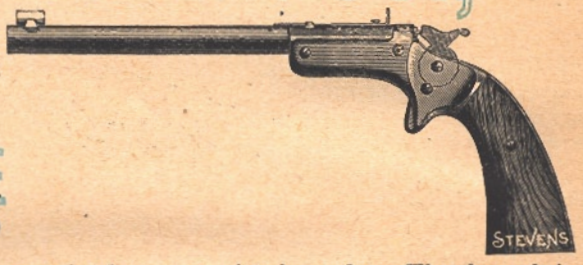

TIP-UP PISTOLS.

This is an accurate little pocket pistol made in .22, using the .22 Short R. F. cartridges. It is full nickel plated, with 3½ inch barrel. Plain walnut grip stock, nicely finished.

It is also a convenient little pocket pistol where it is desired to shoot at a mark at short ranges, say up to 15 or 20 yards.

No. 41—22 Short R.F...Price $2 50

DIAMOND MODEL TARGET PISTOL.

Blued Barrel, long plain grip stock, nickel plated frame. Cut illustrates pistol with globe and peep sights.

For the .22 Long Rifle R. F. Cartridge only

No. 43—6 inch barrel, with globe front and peep sights (as illustrated), weight 10 ounces.....Price $5 00

The Diamond Model.—This is by all means the finest low priced target pistol made. The barrel is made with the utmost care, and every pistol is carefully tested and sighted before shipping. The accuracy of the Diamond pistol even up to 50 yards and beyond, is simply wonderful.

It should be borne in mind that a single shot pistol of this type is much more accurate than a revolver, owing to the fact that the bullet gets the full force of the gas expanding, and there is no escape of gas as is the case with revolvers.

The construction of this pistol is such that it is peculiarly adapted to target shooting. The grip is long ,the balance perfect.

GOULD MODEL PISTOL.

The Stevens-Gould Model Pistol is used by experts throughout the country. It is fitted with open wind-gauge rear sight and bead front sight, walnut handle, finely checked, long grip, nickel plated frame, guard and butt.

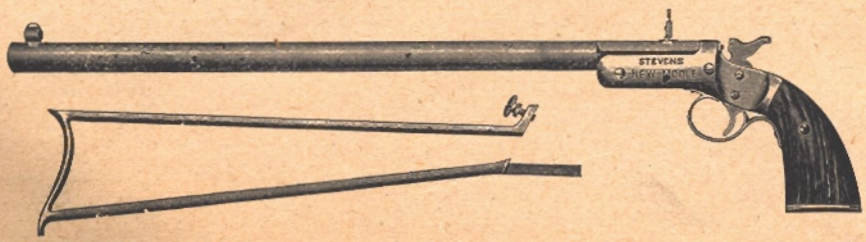

For the .22 Long Rifle Rim Fire Cartridges.

No. 37—With 10 inch barrel, weight about 2 pounds.....Price $15 00

Made to special order for the following Centre Fire cartridges :—

.32 Long, .38 Long, .32-34 S. & W. and .38-44 S. &. W., $2 00 extra.

NEW MODEL POCKET OR BICYCLE RIFLE.

BROWNING.

No. 1901—Browning Automatic Repeating Pistol.....$23 00

The Browning is the Simplest, the most Practical, the Surest and Strongest of all. Its most remarkable features are its Accurate and Quick Firing qualities. It represents a perfect weapon.

Rapidity.—Seven shots can be fired successively by pressing the trigger seven times in less time than any other small arm.

Safety.—The Pistol can be carried without the least danger. When the firing mechanism is locked, the Pistol is absolutely harmless.

Construction—The construction is symmetrical and of a most graceful shape.

Weight.—The weight of a non-loaded Pistol does not exceed 1¼ lbs.

Special Catalogue on application.

N. P. L. Crystalized Sperm, Gun Grease, Rust Preventive	1 00

N. P. LEACH'S ALL-IN-ONE LEAD DESTROYER.

DIRECTIONS.

To remove lead from gun barrel, warm the barrel with a loose swab, apply a thick coating of this mixture, then let the barrel stand in a warm place for several hours, then wipe dry with swabs made of coarse cloth.

If the barrel is badly leaded it may require several applications.

Wear gloves while using the Lead Destroyer and do not let it touch the outside of the barrel, as it would be liable to remove the blueing.

Per dozen $5 50
